Explanatory Notes

Trawling for Norway Lobsters

From 1st October 1958, it became legal to use beam or otter trawls for the capture of Norway lobsters (*nephrops norvegicus*) in certain limits of the Firth of Forth during the period from 1st October in any year to 30th April in the immediately following year. The results of this fishing for the period from 1st October to 31st December 1958 are shown separately in Table 13.

Crabs, Lobsters and Oysters

From 1st January 1958, the landings of crabs, lobsters and oysters have been recorded in cwts. instead of numbers as previously.

Classification of squids

In the tables for 1954 and earlier years, squids have been classified as demersal fish. It was decided in view of the zoological classification of squids as members of the mollusc group that it was more appropriate for statistical purposes to classify them as shell fish. Effect has been given to that decision in the tables from 1955.

DIGEST OF SCOTTISH STATISTICS

No. 13 - April 1959

Price 5s. per copy
(by post 5s. 6d.)

THIS Digest is prepared half-yearly by the Scottish Statistical Office, St Andrew's House, Edinburgh, in collaboration with the Statistics Divisions of Government Departments. In 1958, it was enlarged to 48 pages by the addition of thirteen new tables and extension of the new information including *inter alia* capital expenditure and cost and proceeds of the nationalised fuel industries, road and canal transport, local authorities' income and expenditure, inland revenue duties, civil and licensing courts and the weather.

The wider scope of the Digest should enhance its value to industrialists, business executives, economists, journalists and all who are interested in the social economy of Scotland. A feature of the Digest is the quarterly Index of Industrial Production giving a measure of the changes since 1948 in the volume of output of a wide range of Scottish industries.

The statistical information is arranged under the following headings.
