Do you keep chickens, ducks, geese...?
Help protect your birds from the risk of #birdflu

Did you know?
There is a constant risk of bird flu in the UK from wild birds. As it's highly contagious take action to protect your birds from catching it.

Remember
Any very sick birds, or unexplained deaths, must be assessed by your vet. By law suspicion of bird flu is notifiable and can affect poultry movement and trade.

Tip 1: Cleaning
Clean footwear before and after visiting your birds. Keep areas clean and tidy, and regularly disinfect hard surfaces. Humanely control rats and mice.

Tip 2: Feeding
Place your birds’ food and water in fully enclosed areas that are protected from wild birds, and remove any spilled feed regularly.

Tip 3: Fencing
Keep your birds separate from wildlife and wild waterfowl by putting suitable fencing around the outdoor areas they access.

Tip 4: Register
Register your birds online and get alerts on any outbreaks of bird flu
