

Project Initiation and Business Cases Handbook

Chapter 12

Building Information Modelling (BIM)

Contents:

Section	Subject
1.	<u>Overview</u>

Overview

- 1.1. Building Information Modelling uses digital technology to improve the sharing and analysis of data during the construction and operational phases of projects.
- 1.2. [Scottish Procurement Policy Note 1/2017](#) set out the requirement for public authorities within the scope of the Scottish Public Finance Manual to assess their projects for BIM via the [BIM Grading Tool](#) for projects above £2m in value.
- 1.3. Full guidance is provided via the [BIM Portal](#) which also provides case studies, descriptions of the BIM standards and other resources to assist project teams in their use of BIM.
