39.1. Any failure of either Party to insist upon strict performance of any provision of the Framework Agreement, or the failure of either Party to exercise, or any delay in exercising, any right or remedy does not constitute a waiver of that right or remedy and does not cause a diminution of the obligations established by the Framework Agreement.

39.2. Accordingly, no waiver is effective unless it is expressly stated to be a waiver and communicated to the other Party in writing in accordance with clause 12 (notices).

39.3. The rights and remedies provided by this Framework Agreement are cumulative and may be exercised concurrently or separately, and the exercise of any one remedy shall not be deemed an election of such remedy to the exclusion of other remedies.

40. Force Majeure

40.1. Neither Party is liable to the other Party for any delay in performing, or other failure to perform, its obligations under the Framework Agreement to the extent that such delay or failure is a result of Force Majeure. Nonetheless, each Party must use all reasonable endeavours to continue to perform its obligations under the Framework Agreement for the duration of such Force Majeure. However, if Force Majeure prevents either Party from performing its material obligations under the Framework Agreement for a period in excess of 3 months, either Party may terminate the Framework Agreement with immediate effect by notice.

40.2. Any delay or other failure by the Contractor in performing its obligations under the Framework Agreement which results from any failure or delay by a Contractor Representative is only to be regarded as due to Force Majeure if that Contractor Representative is itself impeded by Force Majeure from complying with an obligation to the Contractor.

40.3. If either Party becomes aware of Force Majeure which gives rise to, or is likely to give rise to, any delay or failure on its part as described in clause 40.1, it must immediately notify the other Party of the Force Majeure and the estimated period for which the failure or delay is to continue.

40.4. The only events that afford relief from liability for failure or delay under the Framework Agreement are Force Majeure events.

41. Disruption

41.1. The Contractor shall take reasonable care to ensure that in the performance of its obligations under the Framework Agreement it does not disrupt the operations of the Authority, its employees or any other Contractor employed by the Authority.

41.2. The Contractor shall immediately inform the Authority of any actual or potential industrial action, whether such action be by their own employees or others, which affects or might affect its ability at any time to perform its obligations under the Framework Agreement.

41.4. If the Contractor's proposals referred to in clause 41.3 are considered insufficient or unacceptable by the Authority acting reasonably, then the Authority may by notice terminate the Framework Agreement with immediate effect.

42. Termination Rights

42.1. The Authority may terminate the Contractor's interest in the Framework Agreement by notice to the Contractor with immediate effect if the Contractor commits a Default and if:

42.3. The Authority may terminate the Framework Agreement if a Call-off Contract is terminated because of a Default by the Contractor.

42.4. The Authority may terminate the Contract in the event that:

- (a) the Contract has been subject to substantial modification which would have required a new procurement procedure in accordance with regulation 72(9) (modification of contracts during their term) of the Public Contracts (Scotland) Regulations 2015; or
- (b) the Contractor has, at the time of contract award, been in one of the situations referred to in regulation 58(1) (exclusion grounds) of the Public Contracts (Scotland) Regulations 2015, including as a result of the application of regulation 58(2) of those regulations, and should therefore have been excluded from the procurement procedure.

 - Provide an easy route to market for Framework Public Bodies and a co-ordinated central point of contact for contract management;
 - Drive best value for money for complex print estate solutions through further competition, device rationalisation, transactional efficiencies and consolidated delivery
 - Include flexibility to introduce new technology and innovative environmental and technology-related initiatives through a process of continuous improvement during the term of the Framework Agreement

- 1.4. The Framework Agreement supports the Scottish Government's National Performance Framework, and the National Outcomes which articulate the Government's Purpose 'To focus on creating a more successful country with opportunities for all of Scotland to flourish through increased wellbeing, and sustainable and inclusive economic growth'.
- 1.5. The Framework Agreement will be managed by the Scottish Procurement and Property Directorate (SPPD) on behalf of the Authority. The Framework Agreement will form part of a wider portfolio of ICT Products Frameworks which are available to Framework Public Bodies, designed to support the Digital Public Services Strategy: Realising Scotland's full potential in a digital world: a digital strategy for Scotland.
- 1.6. One of the drivers for this strategy is to ensure ICT is deployed in an energy-efficient and decarbonised manner which reduces the carbon footprint of Scottish public sector organisations and its supply chain. The Green ICT Strategy and Climate Change Plan, including the target for net-zero emissions by 2045, support the Scottish Government's objective for A Greener Scotland and a Circular Economy. Scottish public sector organisations will be encouraged to contribute to their own vision for a cost effective, sustainable and energy efficient ICT estate by purchasing through these National Frameworks.

- 1.7. The Contractor will be required to minimise the environmental impacts of products and services delivered under the Framework Agreement, while supporting efforts to address the Climate Emergency, contribute in a meaningful way to the transition to a more circular economy including through the application of the waste hierarchy, provide relevant opportunities for community benefits, and provide assurance regarding fair work practices and respect for labour rights and working conditions in the supply chain.
- 1.8. The Contractor will meet the minimum requirements set out in this specification and ensure delivery of a high quality service to Framework Public Bodies using this agreement. The Contractor will be expected to demonstrate the application and implementation of leading industry practices within internal and customer-facing processes.
- 1.9. The Contractor will at all times adopt and apply industry best-practice in the performance of the Framework and fully participate in continuous improvement and other initiatives to ensure the long term success of the contractual relationship and that value received by Framework Public Bodies is demonstrably greater than could be achieved by sourcing the required goods and services elsewhere.
- 1.10. The Contractor will work with the Authority and/or Framework Public Bodies to map the full end-to-end supply chain, identify and prioritise supply chain initiatives which drive down cost, and improve quality and efficiency, throughout the term of the framework.
- 1.11. To maximise use of the Framework Agreement, the Contractor will be required to support the Authority in promoting the Framework Agreement across the Scottish public sector, at no additional cost. The Contractor will be required to actively promote the benefits of the Framework Agreement. This activity will be managed by the Contractor's Framework Managers in conjunction with the Authority.

2. Product Range

- 2.1. The ICT Products Portfolio is made up of the Framework Agreements detailed below. Further details on all other Framework Agreements can be found on the Scottish Procurement Contracts Directory.
- 2.2. The use of this Framework is not mandated, therefore, in order to maximise the use of the Framework Agreement, the Contractor(s) will be required to support the Authority in promoting the Framework Agreement across the Scottish public sector, at no additional cost. The Contractor(s) will be required to actively demonstrate and sell the benefits of the Framework Agreement including cost, environmental, resource and operational efficiencies.

3. Framework Scope

- 3.1. The Managed Print Solutions Framework will include a wide portfolio of print products ranging from small single function desktop printers to large print room high volume products, consisting of mono and colour, network and non-network requirements. - 3.3. Products must be fit for purpose, free of defects and be of a sufficient range to provide Framework Public Bodies with flexibility and choice. In addition to the initial products proposed, there is a requirement to provide additional product functionality, including the ability to introduce new products to the Framework Agreement. - 3.10. Once devices are resident on the framework, where the manufacturer changes any aspect of the product range, the Authority reserves the right to transition to the latest device with no change to the costing methodology.

4. Future Requirements and Ways of Working

- 4.1. The Authority is cognisant that in light of the ongoing COVID-19 pandemic, Framework Public Bodies are in a state of transition and 'normal' business activity is changing. Most notably the increased demand for flexible home working and conducting business activities outside the office environment. Framework Public Bodies returning to buildings may require equipment to be relocated throughout a contract term. Tenderers must be able to provide service solutions that support new ways of conducting business including delivering supplies, services and solutions to those engaged in remote working.
- 4.2. The Contractor shall support the Scottish public sector's digital transformation objectives through the adoption of new technologies in the market. This includes taking advantage of the benefits that Managed Print Services can provide to achieve greater management control of costs, rationalise their print estate, and deliver an optimised, more secure printing network that eliminates manual tasks and improved workflow strategies.

5. Framework Start Date

- 5.1. The Framework Agreement will commence on 22nd August 2022.

Catalogues will be utilised by the Contractor and the Authority to promote and communicate the benefits of the Framework Agreement to eligible public sector bodies. This will be available electronically from the Framework Commencement Date via the Scottish Procurement Knowledge Hub site.

- 9.2. The device prices will be fixed for the duration of the framework agreement, unless improved upon through continuous improvement, product rationalisation and/or mini competition. The Contractor(s) must do everything within their ability to mitigate the impact of this in relation to framework value for money.
- 9.3. The Principal Catalogue will include details of the pricing contained in “Schedule 2 (Pricing) – Managed Print Solutions”. All pricing detailed in the Principal Catalogue will be maximum pricing any Framework Public Body would pay when calling off from the Framework. The Authority and the successful Contractor will agree this final Principal Catalogue within two (2) weeks of Framework Award.

10. Price Benchmarking

10.1. The Contractor(s) will be expected to benchmark, review and improve, wherever possible, the framework pricing.

13. eCommerce

13.1. Scottish Ministers (through the eCommerce Shared Service) have introduced and are aspiring to reach a level of 100% eInvoicing. A number of public sector organisations use systems managed by the Scottish Government eCommerce Shared Service. Further information regarding the eCommerce Shared Service and the solutions they manage can be found at:

<https://www.gov.scot/policies/public-sector-procurement/support-for-public-sector/>

- 13.2. The Contractor is required to work with the Authority and the Framework Public Bodies in the promotion of process efficiencies, e.g. providing electronic and/or consolidated invoices, if required.
- 13.3. The Contractor will work with the Framework Public Bodies to ensure a smooth transition to their preferred eCommerce route; e.g. online portal, dedicated portal, punch-out implementation, or a combination of these.
- 13.4. Due to the nature of this collaborative procurement, Framework Public Bodies are at different stages of automation. Additionally, the Contractor must be able to provide 'traditional' forms of communication, such as, orders via telephone and paper.
- 13.5. Invoices must include Purchase Order number and line item detail of the items being invoiced.

14. Minimum Hardware Specification

- 14.1. The Contractor will be required to supply products which meet the Minimum Hardware Specification as specified at Annex B.

15. Product Availability

- 15.1. Where any product, model or accessory is deemed unavailable, the Contractor is required to propose, at no additional cost, an alternative product, model or accessory to a similar specification or as requested by the Authority and/or Framework Public Body. - 18.2. The Contractor is required to provide consumables for all devices, except 3D printers and Wide Format devices, with support and maintenance cover including toner and staples.
- 18.3. The Contractor shall ensure that all Consumables are available for each device at least seven (7) years after manufacture of the device ends. The Contractor shall ensure that all consumables products supplied under the Framework Agreement meet all relevant legislation at the time of installation.
- 18.4. Consumables will be required to be ordered by the Framework Public Body along with the initial product order. The Contractor is required to deliver the consumables within 2 Working Days of delivering and installing the product. Further orders for consumables will be issued by the Framework Public Body throughout the product life. Additional orders can be submitted in an electronic format by referencing the product serial number. All additional orders are required to be delivered within 5 Working Days.
- 18.5. The Contractor will have a system for collection and return of spent bottles and cartridges. This system may similarly apply to other waste e.g. waste toner, developer liquids and powders, replaceable units such as fusers or developers. These collection services are to be provided at a minimum cost to the Framework Public Body.

19. Spare Parts

- 19.1. The Contractor will ensure that for each product supplied, they are able to provide spare parts for a minimum period of 7 years, from the date the product is withdrawn from production, thus extending the useful life and minimising the environmental impact of the product. The spare parts used should have no detrimental effect on performance or warranty provision.
- 19.2. For remanufactured or refurbished devices, the Contractor will ensure all parts, options and accessories are available for each device at least five (5) years after remanufacture of the device terminates.

20. Free Product Trials

- 20.1. To allow Framework Public Bodies to determine that devices are 'fit for purpose' in meeting their specific requirements, the Contractor will provide evaluation devices (excluding VHV) on a free of charge, trial basis. The duration of the evaluation process will be agreed between individual Framework Public Bodies and the Contractor.
- 20.2. The Contractor will facilitate the evaluation process including delivery and collection of evaluation devices. The Contractor will be required to maintain sufficient stock of evaluation devices within their loan pool to ensure devices are available concurrently to a number of Framework Public Bodies.
- 20.3. The Contractor must ensure availability of devices for individual organisations and/or sectors, to allow sufficient time to facilitate the introduction of the new devices into their corporate environment. The evaluation loan pool must be sufficiently stocked to facilitate a number of concurrent requests for devices.

21. Service Delivery, Support and Maintenance

- 21.1. It is essential that the Contractor provides national coverage of services, solutions deliveries and supplies from Framework Commencement Date throughout the whole of

Scotland with the same level and quality of service, irrespective of size or geographical location. The national coverage for this Framework Agreement must have the “look and feel” of a local and responsive service delivery. The service coverage requirements are illustrated at Annex D.

- 21.2. There may be a requirement for the Contractor to provide a limited number of Goods, Services and associated Software in other areas of the United Kingdom to support satellite offices of Scottish Framework Public Bodies.
- 21.3. The Contractor must provide the Framework Public Body with a single point of contact capable of logging technical support calls and handling support issues (e.g. service and maintenance) for their entire print fleet, including legacy products.

22. Response Times

22.1. The Contractor will have a proven fault reporting and rectification service with defined contact numbers and procedures.

22.2. Standard response is required when a product has failed, irrespective of whether some functionality may still be available or alternative products available. Response Time is defined as:

“The time it takes for an engineer to attend the Framework Public Body’s site (or resolve remotely) after the fault has been reported to the Contractor”.

22.3. The Contractor must demonstrate that they can provide a genuine standard Response Time of next Working Day but no longer than 24 hours after the fault has been reported to the Contractor unless otherwise agreed with the Framework Public Bodies for all catalogue devices with the exception of Very High Volume. A standard Response Time of 2 Working Hours is applicable for Very High Volume products. Response times will cover the defined Working Hour and Working Day and cover both the products and software elements across the geography of Scotland.

22.4. There will be a requirement for the Contractor to provide a Critical Response Time of 2 Working Hours from the time a fault was reported to the Contractor. Critical response time is typically required when a product has completely failed and there is no reasonable alternative product/option available. The Framework Public Body will identify the response required as “critical” when reporting the fault. The definition of a critical response and associated critical criteria should be agreed at the start of the agreement between the Contractor and the Framework Public Body.

22.5. The Contractor will be required to provide a maximum fix time of 4 Working Hours from the point where work commenced to resolve the fault.

22.6. The Contractor will be required to provide a First Time Fix report to determine and minimise the number of return visits per product. First Time Fix is defined as:

“The volume of faults per product fixed first time that did not require a follow up visit to repair a similar fault within a 4-week timeframe.”

23. Product Up Time

23.1. The average "uptime" for all Hardware and Software, except 3D Printing, supplied under this Framework Agreement must meet 97% or better based on a standard Working Day.

23.2. Uptime is defined as the % of time that all primary functions are running simultaneously. Primary functions include print, copy, scan, email and/or fax plus any other feature critical to the performance of the product.

24. Helpdesk

24.1. The Contractor is required to operate their own helpdesk, with specified staff familiar with the account, to assist Framework Public Bodies with general and orders enquiries, logging calls, providing technical support, consumable support (i.e. service, maintenance, IT), other assistance and an engineer call out facility. The helpdesk should operate between the defined Working Hour and Working Day.

24.2. The Contractor is required to log all calls, providing the Framework Public Body with a unique reference number in order to track their incident, including immediate fixes and effectively manage all incidents raised. The helpdesk should include a 2nd line capability where fully trained engineers with full technical knowledge of the products are available in order to try and resolve more complex problems without having to send an engineer to the Framework Public Body's site.

24.3. The Contractor is required to provide a remote technical resource to the Framework Public Body free of charge. This technical resource must be a fully trained engineer with full technical knowledge of the products. The purpose of the technical resource is to try and solve the problem quickly and potentially without having to send out an engineer.

25. Hours of Service

25.1. The Contractor must be flexible to suit Framework Public Bodies specific requirements and, if need be, adjust these standard start and finish hours whilst still providing the specified levels of support and maintenance.

25.2. The Contractor will be required to provide support and maintenance outside the standard days/hours, if requested by the Framework Public Body through further competition. This may also include 24 hours by 7 days' service (including Scottish public holidays).

26. Delivery Locations and Installation

26.1. In response to COVID-19, there has been a requirement from some Framework Public Bodies for devices to be delivered to non-business locations. Where requested, the Contractor must be able to arrange delivery to non-business locations and have in place robust processes to ensure devices are fully traceable and include proof of delivery by a nominated individual only.

26.2. A full delivery service must be provided, which includes but is not limited to the following:

- Bulk delivery to stores – one bulk delivery to one central point.

- Multiple locations – one order with multiple site locations spread across a geographical area, e.g. a Local Authority or home addresses.
- Call off – one bulk order to be held, in bonded storage, and called-off by the Framework Public Body as and when required. For bonded storage, the Contractor reserves the right to invoice for any goods delivered.

26.3. The Contractor must provide reliable but realistic timescales for delivery. Fixed delivery timescales will be detailed in the Principal Catalogue. The Contractor must provide regular updates to the Framework Public Body prior to delivery (products, services or consumables) to agree delivery, date, time, location and access details. An additional 2 Working Days will be allowed for remote and island locations, unless otherwise agreed with the Framework Public Body.

26.4. The Contractor must have the flexible logistics and delivery capability to service Buyers' requirements that fall outside office hours due to operational requirements.

26.5. Upon delivery and installation, the Contractor must ensure that the Framework Public Body is satisfied with the delivery, installation and general condition of the product ordered. The Contractor must ensure that all instructions, operating manuals and a logbook for repairs are delivered with the products.

26.6. No deliveries are to take place outside of defined Working Hours unless otherwise agreed. Restricted periods e.g. during lunch breaks may be imposed on deliveries to schools and other similar locations; the individual Framework Public Body would be expected to advise the Contractor(s) of any specific requirements. When making deliveries to schools, personnel must report first to the school office and delivery vehicles may be driven through school playgrounds only on the approval and direction of an authorised person.

26.7. Typically, a signature will be required for each delivery made. Under no circumstances should goods be left outside the building. No mechanical off-loading, lifting or moving equipment is supplied by the Framework Public Body. No assistance is available to the Contractor for the purpose of off-loading and placing goods within the delivery location.

26.8. In the event of a query, the Contractor will be expected to provide proof of delivery, electronically if required, to the Framework Public Body.

27. Consolidation

27.1. Unless expressly agreed by the Framework Public Body, deliveries should be consolidated, i.e. where a device and accessories have been ordered together on a single Purchase Order, all items should arrive at the requested delivery location in one consignment.

28. Lead Times

28.1. It is recognised that in light of the ongoing COVID-19 pandemic, 'normal' delivery lead times are significantly impacted. Unless otherwise agreed with the Authority, it is expected that maximum lead times for standard core devices will be ten (10) Working Days from receipt of a valid Purchase Order. Non-standard configurations and additional services will each incur an additional five (5) working day lead time, taking the maximum to twenty (20) Working Days.

28.2. In remote and island locations, the lead time may be extended by two (2) Working Days. The Contractor should, however, endeavour to achieve the standard lead time where possible.

29. Returns & Collections

29.1. Items which are faulty or develop a fault will be covered by a minimum 12-month warranty or the manufacturer's warranty, whichever is greater. Framework Public Bodies will endeavour to notify the Contractor of Goods which are faulty, received in a damaged state or delivered in error, within 5 Working Days of receipt. Where the Contractor has been advised of any faulty, damaged or incorrectly delivered items these must be replaced or uplifted by the Contractor within 5 Working Days.

29.2. Framework Public Bodies will endeavour to ensure that the Goods are available for collection, unopened (if received in error) and in the same condition they were received. All damaged or incorrectly delivered items must be replaced by the Contractor(s) within 5 Working Days of receiving such notice from the Framework Public Body. The Contractor(s) must arrange for the immediate replacement and collection of the damaged items, at no cost to the Framework Public Body.

29.3. The Contractor will monitor and report to the Authority the level of returns and ensure compliance with the relevant key performance indicator. The Contractor(s) will be expected to monitor the level of returns and to work with Framework Public Bodies to reduce levels (excluding sample and evaluation products).

29.4. Sample and evaluation products can be supplied on a sale or return basis; Framework Public Bodies will be expected to return items in a state fit for re-sale.

29.5. Items ordered in error by a Framework Public Body may be returned at the sole discretion of the Contractor and may be subject to a restocking fee. The restocking fee will not exceed 10% of the unit cost including the cost of collection depending on the weight and/or dimensions of the product.

29.6. The Contractor, as part of a lease contract, must remove old machines that are end of life or end of lease term at no additional cost to the Framework Public Body.

29.7. Framework Public Bodies who wish to cancel an order at no cost must confirm in writing to the Contractor no later than 14 days prior to the scheduled delivery date.

30. Meter Reading

30.1. Framework Public Bodies will be encouraged to submit automated meter readings direct from each networked product to the Contractor. The Contractor must also be able to accept manual meter readings as otherwise agreed with the Framework Public Body.

31. Transport Fleet

31.1. The Contractor and/or their delivery and logistics partners will maintain an efficient delivery fleet and minimise the environmental impact associated with the delivery of devices through efficient logistics, full load deliveries, effective driver training and low or zero emission fleet. The Contractor will support measures to address the Climate emergency through fleet management and will monitor and report on the efficiency of the delivery fleet and implement measures to reduce the environmental impact over

the term of the Framework Agreement. If delivery is sub-contracted, the Contractor(s), must be able to report on fleet management.

32. Training

32.1. The Contractor will be required to provide appropriate training packages to ensure the smooth running of the products and services. Basic, “green button” training will be free of charge and should normally take place at the Framework Public Body’s premises within one Working Day of installation, unless otherwise specified by the Buyer. A bespoke blended training programme will be created by the Contractor to deliver training in thirty minute scheduled sessions prior to installation, allowing users an opportunity to understand the new print solution. Training may be delivered on-site training, remote training via web, and user documentation in electronic format.

32.2. The level and type of training will be as agreed by the Contractor and the Framework Public Body. Basic “green button” training, as a minimum, should include: -

- Understanding the new technology and functionality
- Troubleshooting in the event of paper jams
- Replacement of toner cartridges and preparing empty cartridges for return
- Resolution for basic error codes

32.3. Advanced training courses beyond the basic “green button” training described above may be provided in agreement with the Framework Public Body are chargeable, either on a per hour, per half or full day basis.

33. Provision of Managed Print Services

33.1. There will be a requirement for the Contractor to deliver a Managed Print Service (MPS) to suit individual Framework Public Body’s requirements. Framework Public Bodies will be expected to provide full details of any such requirements when undertaking further competition.

33.4. For example, some elements of the scope that could be considered and incorporated into a MPS may include:

- The ability to deliver both forecast and actual savings

- 34.2. These additional services are for Framework Public Bodies who wish to have one Contractor manage their entire print requirements. These services must be procured as part of a MPS further competition and cannot be procured independently.
- 34.3. The Contractor will be able to propose additional non-mandatory services available as part of a larger MPS mini competition that could be made available to Framework Public Bodies during the Framework through further competition. The inclusion of these on the Framework will be at the sole discretion of the Authority.
- 34.4. If the Contractor who cannot provide any of these services, it could still be awarded a place on the Framework, but may be not be invited to further competitions where Framework Public Bodies have these requirements.

36. Legacy Products

36.1. The Contractor may be required, as part of delivering a MPS, to provide a management option for providing support and maintenance for legacy products (multi-vendor products) deployed across the Framework Public Body's estate. This facility will provide nominated IT Personnel with priority telephone access to expert technical resources, who have been specifically trained to deal with problem diagnosis and resolution, quickly and efficiently, for in-warranty devices. The ability for Framework Public Bodies to access technical resources, log and track hardware calls must be available as part of this warranty service.

37.2. The provision of on-site warranty requires the device to be maintained by a qualified service engineer, at the Framework Public Body's site. The device should not leave the Framework Public Body's site unless it is considered to be 'Dead on Arrival' (DOA), at which point the procedure for dealing with DOA devices should be invoked.

37.3. The Contractor shall replace unrepairable machines free of charge as part of the warranty provided and provide timescales for the replacement of unrepairable machines.

37.4. For devices such as 3D Printers, which do not fall under a typical service agreement, the Contractor must provide a collect and return warranty.

38. Warranty Registration

38.1. The Contractor must have a process in place to ensure the appropriate level of warranty has been registered, ensuring a seamless process for Framework Public Bodies to log warranty calls.

39. Baseline Personnel Security Clearance

39.1. Framework Public Bodies may require differing levels of security clearance for Contractor personnel required to work on-site within their premises or granted with remote access to their networks. As a minimum, the Contractor must ensure they have a sufficient number of Baseline Personnel Security Standard (BPSS) security cleared qualified service engineers, available to meet the agreed KPIs and service provision across the geography of Scotland from Framework Commencement date. Framework

Public Bodies will be expected to inform the Contractor of any sensitive locations where security clearance is required for drivers and travelling representatives.

- 39.2. The Contractor will undertake appropriate security and other checks, including Disclosure Scotland, necessary to ensure that their employees, agents, representatives, and sub-contractors are suitably screened to undertake deliveries and other visits to sensitive locations such as schools, hospitals and government buildings. Details of Disclosure Scotland requirements can be found at:

Any remote access required must be agreed in advance with the Framework Public Body.

41. Maintenance Services

- 41.1. Maintenance services will be mandatory for leased products. This service will include as a minimum; installation to an agreed level, removal of packaging, network connection, basic training, preventative and breakdown maintenance (including software), firmware, remote support, network support, parts, toner, consumables and staples or any additional maintenance services identified through further competition.

42. Preventative Maintenance

- 42.1. The Contractor will be required to provide preventative maintenance as part of this Framework Agreement. This covers the care and servicing by the Contractor's personnel for the purpose of maintaining equipment and services in a satisfactory operating condition by providing for systematic inspection, detection, and correction of incipient failures either before they occur or before they develop into major defects.

43. Dead on Arrival Equipment (DOA)

- 43.1. Equipment can be classed as dead on arrival "DOA" up to 30 days from a Framework Public Body's receipt of the device. For the avoidance of doubt, DOA means the product cannot be physically powered on or be ready for use after removing the device from the packaging.
- 43.2. In the first instance DOA items should be replaced. In the event that a replacement cannot be provided due to product constraint or supply chain difficulty, the Contractor should, with the Framework Public Body's agreement, repair the product in line with the terms of the warranty arrangements for that particular device.
- 43.3. The Contractor will expedite the delivery of replacement items to the Framework Public Body to ensure minimal disruption.

The Contractor must keep the Authority updated to any changes in their ISO accreditation, or equivalent, in relation to Information Security Management for this Framework Agreement. Please note that individual Framework Public Bodies may require other accreditations or equivalents.

45.2. Due to the sensitive nature of public sector data, there will be Framework Public Bodies whose IT policy dictates that, in the event of a fault, repair, end of life or lease, media (internal or removable) should not be removed from the premises. The Contractor will have a procedure in place for the secure disposal and transport of internal or removable media e.g. the provision of defective media retention Services at minimal costs to the Framework Public Body. Evidence of the steps taken by the Contractor for the destruction of any media should be provided to the Framework Public Body along with a certificate as proof of destruction. The successful Contractor will be responsible for promoting the benefits and availability of the media retention service.

45.6. The Contractor will be required to test and evaluate each new product before it is installed on the live environment (unless otherwise agreed with the Framework Public Body). The testing and evaluation should take place in a secure, isolated environment segregated from the live network at the Framework Public Body's premises unless otherwise agreed. Timescales for the testing and evaluation will be agreed between the Framework Public Body and the Contractor.

- 45.7. If required and where authorised by the Framework Public Body, The Contractor may be required to connect products to a Framework Public Body's network infrastructure. This must be carried out using appropriately qualified staff.
- 45.8. The Contractor will provide (if requested by a Framework Public Body) fully updated testing and evaluation records and reports within one (1) Working Day of final acceptance of the product by the Framework Public Body.
- 45.9. Where devices are connected over the internet to Contractor's systems for collection of metrics such as printer cartridge level, number of copies, etc., the Contractor must detail what information is required to be sent outside the Framework Public Body's network and to where. The Contractor may also be required to provide details of how this information would be securely transmitted.
- 45.10. The Contractor must have procedures to provide the following services aligned to the National Cyber Security Centre Secure sanitisation of storage media guidance or to a standard as agreed with Framework Public Bodies at no additional cost:
- Data encryption;
 - Data overwrite;
 - re-format of the HDD and cleanse of device memory at end of life;
 - full device cleanse including the HDD and removal of latent imagery at end of life;
- 45.11. The Contractor shall make available additional procedures for protecting and managing the risk associated with data stored on the HDD, when requested by Framework Public Bodies. These requirements will be chargeable to Framework Public Bodies at the Call Off stage and shall include, but are not limited to, the following:
- certified removal and/or disposal of the HDD by the Contractor at end of life; and
 - certified destruction of device components.

46. Solutions

- 46.1. The Contractor will work with Framework Public Bodies to identify and propose solutions which will provide the best fit and value for the Framework Public Body's print environment.
- 46.2. Where a Framework Public Body arranges a discovery day, the Contractor will be required to actively participate. Discovery days will be utilised by Framework Public Bodies to engage with the Contractor for the purpose of defining, refining and developing service requirements prior to undertaking a mini competition under the Framework Agreement. There should be no charge from the Contractor for participation in discovery days.

47. Site Survey

- 47.1. Within the scope of this Framework Agreement, the Contractor may be required to conduct site surveys as part of a mini competition exercise or as the incumbent supplier in support of continuous improvement. Site surveys may provide recommendations as to how the Framework Public Body could optimise productivity, reduce cost and environmental impact (in terms of kWh and CO2 savings) in relation to their print environment.

47.2. The scope and timing of the site survey will be agreed between the Framework Public Body and the Contractor. It is expected that a typical survey may include: -

- Current print device fleet
- Current software solutions and core functions
- Current service costs
- Current print volumes
- Current issues e.g. over use and/or end of life
- Strategic drivers e.g. support move from paper to digital

48. Continuous Improvement

48.1. The Contractor shall work proactively with Framework Public Bodies to deliver cost and resource savings; service quality and improvement; and environmental and sustainability benefits.

48.2. If requested by a Framework Public Body, the Contractor may be required to provide regular reviews (post contract award) to help identify areas for improvement and greater demonstrate the value of the contractual relationship. These reviews are to be free of charge and should be conducted as per the Framework Public Body's requirements. All reviews should be followed up by a written report detailing areas for improvement and recommended actions.

48.3. If required by the Framework Public Body, the Contractor shall ensure increase and improve the User per Device ratio to support the ongoing reduction of print costs.

49. Print Management Software

49.1. The Contractor will be required to provide a range of print management software (known as “inclusive software”).

49.2. The Contractor will ensure all “inclusive software” is delivered, fully tested and working upon installation of the product (unless otherwise agreed with the Framework Public Body).

49.3. All software must be provided with support and maintenance (unless otherwise requested by the Framework Public Body). Framework Public Body requirements will vary and as such Tenderers' software should be capable of interaction with a wide range of software systems.

49.4. The provision of Software supplied under this Framework Agreement may be on the basis of a co-terminus agreement whereby the licence will expire at the end of the Call Off Contract period, unless otherwise specified by Framework Public Bodies.

50. Ordering

50.1. Effective and efficient ordering procedures are required for the Framework Agreement. The Contractor must have flexible but robust systems in place both for responding to requests for further competition and for direct buying and have the ability to receive orders in an electronic format. The document “Schedule 3 (Award and Ordering Procedures) – Managed Print Solutions” provides further detail.

50.2. It is the expectation that the Contractor will accept all Direct Award orders from all Framework Public Bodies. Any refusal to accept an Order under the Framework would require the Contractor to provide a clear justification to the Authority.

51. Order Fulfilment

51.1. The Contractor will ensure an order fulfilment service level equivalent to 97% against the stated lead times for all Goods ordered under the Framework Agreement. The Account Management Team must contact Framework Public Bodies to advise where any requirements may exceed the stated lead times before accepting the order.

52. Order Acknowledgement

52.1. An automated order acknowledgement must be provided within 24 hours of an order being received. If agreed with the Framework Public Body, a weekly automated report must be issued to the Framework Public Body providing information on orders placed, including the Framework Public Body's Order Number, item and quantity ordered and order status (shipped or confirmed delivery date).

53. Financial Options

53.1. The Contractor must provide the flexibility required by the Authority/Framework Public Body in meeting their budgetary and operational requirements. Framework Public Bodies may require alternative pricing mechanisms over and above those stated in the Principal Catalogue (i.e. capital purchase, or operating lease up to 7 years).

53.2. In general, the maximum leased period will be 7 years (10 years for Very High Volume (VHV)), however, Framework Public Bodies may enter into a secondary term but it will not be possible to create continual perpetual financial arrangements for products. There will be no minimum order quantity, billing or page volumes for the products, excluding "No Commitment" agreements.

53.3. Where a Framework Public Body intends to enter a leasing arrangement with a Contractor, funding arrangements must be agreed between the Contractor and Framework Public Body as part of the call off contract. Any bespoke funding arrangements should complement the Framework Agreement and does not seek to replace any aspect of it. For the avoidance of doubt, should there be any conflict between the Agreement and any additional elements within the Statement of Works, the Agreement takes precedence.

Financial Options – Operating Lease

53.4. For the Goods identified in the Framework Agreement, Contractors will be required to make provision for the Framework Public Body to lease products up to 7 year periods plus the requirement for up to 10-year lease for VHV print room equipment. All lease Call-off Contracts will be between the Framework Public Body and the Contractor. Contractors will be required to make provision for a Framework Public Body to lease or loan equipment over shorter terms as requested by the Framework Public Body.

53.5. The lease terms need not be co-terminus unless this is requested by the Framework Public Body. Framework Public Bodies may award Call-off Contracts until the date of expiry of this Framework Agreement, which may run well beyond the duration of this Framework Agreement, potentially up to 10 years for VHV equipment.

- 53.6. Residual values for leased products after 7 years will be zero (10 years for VHV products). Residual values for products leased over a period that is less than 7 years will be identified by the Contractor in response to the Order Form as part of a Direct Award or mini competition.
- 53.7. Framework Public Bodies will have the option to enter into a secondary term subject to agreement with the Contractor. The secondary term will repay the residual value (if applicable) on the same rate basis or lower as required with the Framework Public Body (including per click cost).
- 53.8. Contractors will be required to provide the Framework Public Body with 6 months written notice prior to the expiry date of any individual leased Goods.
- 53.9. All Goods will be considered ready for removal on the expiry date of the lease period. All charges will cease on that day unless otherwise agreed with the Framework Public Body.
- 53.10. Arrangements to remove Goods at the end of the lease period are the Contractor's responsibility and will be at no cost to the Framework Public Body.
- 53.11. Remanufactured or refurbished (reconditioned) products may be considered, providing the products meet all the technical, safety and environmental requirements.

54. Fleet Flexibility

- 54.1. The Contractor must provide flexibility with the Framework Public Body's fleet. No payment of settlement charges should apply where the product is considered redundant due to re-organisation, merger or building closure and when all reasonable efforts have been made to re-site the products within the Framework Public Body. For example, this flexibility may be required when:
- The product does not match the output required and a different product is required.
 - Funding is withdrawn and a Framework Public Body can no longer meet its obligations under the lease.
 - A substantial change is made to the Framework Public Body e.g. amalgamation
- 54.2. To provide the Framework Public Body with sufficient general flexibility in managing their product fleet, the Contractor is expected to offer the flexibility to upgrade and downgrade a minimum of 10% of the Framework Public Body's products supplied during the term of the Framework Agreement at no increase to the Principal Catalogue price.
- 54.3. As part of the call-off process, Framework Public Bodies will confirm whether legacy products would be 'in scope' for their requirement.
- 54.4. When an upgrade or downgrade of a product takes place during the period of the contract, the replacement product will form part of the original contract. The installation will be treated in the same manner as an additional product and the chosen lease term will commence from the installation date. If a settlement charge is payable due to early product termination, it is expected that the Contractor will provide a discount of at least 10%. Except for VHV equipment, re-siting should be free of charge within the same location / building (with no administration cost) unless the Contractor and the Framework Public Body have agreed that the re-siting is chargeable and the Contractor has received an authorised order.

54.5. The Contractor shall agree in advance with the Framework Public Body any additional charges that may be applicable for re-siting of devices to another location. Charges may be incurred where special access requirements are required.

54.6. The Contractor shall ensure that any chargeable re-siting of devices will be invoiced to Framework Public Bodies at cost with no additional margin added by the Supplier.

55. No Commitment

55.1. The Contractor may offer a “No Commitment” financial option to the Framework Public Body for the products identified in the Framework Agreement. This financial option may need to specify a minimum volume and can be indicated on the Pricing Pages.

55.2. “No commitment” is a commercial solution which is, in essence, predicated on leased products not restricted by term length which can be returned, without cost, at any time providing 30 days’ notice is given by the Framework Public Body. The maximum period for any product is 7 years.

55.3. Remanufactured or refurbished products may be considered under the “no commitment” financial option, providing the products meet all the technical, safety and environmental requirements with the applicable certification.

The Authority will monitor the environmental impact of the Framework Contractors through a Sustainability Balanced Scorecard.
- 65.2. The Contractor is expected to assist Framework Public Bodies, where relevant, to be energy efficient, manage waste in accordance with the waste hierarchy, minimise emissions in service delivery, deliver circular economy outcomes and extend equipment useful life, through appropriate measures such as product design that enables disassembly and ease of repair or upgrade, take back of products aligning with Framework Public Bodies replacement cycles, re-use of equipment or parts or re-conditioning of equipment and associated consumables and the provision of pre-owned or used equipment with appropriate certification to quality standards. The Contractor will work with Framework Public Bodies to ensure they are aware of such options.

72. Conflict Minerals

72.1. It is recognised that there are concerns regarding the use of 'conflict minerals' within electronics products, which are mined in conditions of armed conflict and human rights abuses, and which are sold or traded by armed groups. The US introduced the Dodd-Frank Wall Street Reform and Consumer Protection Act 2010 which focuses on certain minerals arising from the Democratic Republic of Congo (DRC) and applies only to US

listed companies. In 2017 the EU adopted the conflict minerals regulations (<http://ec.europa.eu/trade/policy/in-focus/conflict-minerals-regulation/legal-texts-and-documents/>) which obliges EU companies to source their imports of tin, tantalum, tungsten and gold responsibly and to ensure that their supply chains do not contribute to funding armed conflict. These 'due diligence' rules became binding from 1 January 2021.

72.2. Throughout the term of the Framework Agreement, the Contractor will be required to demonstrate how they assess the likelihood of conflict minerals within products, and what measures they have undertaken to minimise and eliminate, where practical, such minerals. The Contractor will be required to comply with any new and emerging legislation and/or self-certification system.

73.1. The Contractor will maintain security of supply through appropriate and comprehensive risk management of supply chain risks which are reasonably within their control and which may arise due to availability of components, environmental, social or other relevant factors so as to ensure, as much as is possible, security of supply of materials, products or equipment essential to the delivery of the required product/service. In managing risks associated with security of supply, the Contractor(s) will apply appropriate strategies in relation to supply chain management, sourcing, logistics and stock management.

74. Social & Ethical Responsibilities

74.1. The Authority has included obligations within the contract conditions relating to supply-chain transparency, ethical working conditions and labour standards, which are relevant to the products/services to be delivered. These obligations reflect Scotland's commitment to economic, social and human rights as reflected in the International Labour Organisation ([ILO](#)) core conventions, the International Covenant on Economic, Social and Cultural Rights ([ICESR](#)), Scotland's National Action Plan for Human Rights ([SNAP](#)), the UN Sustainable Development Goals ([SDGs](#)) and the [Human Trafficking and Exploitation \(Scotland\) Act 2015](#) and the [Modern Slavery Act 2015](#).

The Contractor(s) will take all reasonable steps to ensure that all Goods supplied under this Framework Agreement reflect due regard to ethical sourcing and human rights, working conditions, human trafficking and exploitation / modern slavery, other exploitation and corruption. This includes all International Labour Organisation (ILO) core conventions that have been ratified by the country of their origin. The Contractor(s) promotes human rights including security of employment rights, equality of opportunity, prevention of corruption and fair trade within the supply chain in connection with this Framework Agreement.

74.3. The Contractor(s) will be required to have sustainability code of conduct and policies in place to support sustainability issues. The Contractor(s) will have a comprehensive system which demonstrates an ongoing and systematic approach to identifying and managing risks relating to labour standards, working conditions and use of child labour in the supply chains relevant to the Framework Agreement. This should include policy, roles and responsibilities, objectives, targets and programmes, training, awareness and capability building, communications, documentation and procedures, supply chain management, emergency response, monitoring and reporting (including identification of all suppliers, changes made and audits undertaken in accordance with appropriate standards e.g. ETI Base Code, SEDEX, or equivalent) and corrective action and review procedures.

74.4. The Contractor(s) will be required to demonstrate continual improvement in working conditions and labour standards, while enhancing policies and systems and, where relevant, work with the Authority during the term of the Framework Agreement to ensure compliance with new and emerging legislation.

74.5. The Contractor(s) will be required to have sustainability code of conduct and policies in place to support sustainability issues.

75. Fair Work Practices

75.1. The Scottish public sector is committed to the delivery of high quality public services, and recognises that this is critically dependent on a workforce which is well-rewarded, well-motivated, well-led, has access to appropriate opportunities for training and development, is diverse and inclusive, and can influence decision making. These factors are also important for workforce recruitment and retention, and thus continuity of service delivery.

75.2. Public bodies in Scotland are committed to applying [Fair Work First](#) in their own organisation and in publicly funded supply chains. [Fair Work First](#) is the Scottish Government's policy for driving good quality and fair work in Scotland. Through this approach, the Scottish Government, and its public sector partners, are asking bidders to describe how they are committed to adopting Fair Work First:

- appropriate channels for effective voice, such as trade union recognition
- investment in workforce development
- no inappropriate use of zero hours contracts
- action to tackle the gender pay gap and create a more diverse and inclusive workplace
- providing fair pay for workers (for example, [payment of the real Living Wage](#))
- offer flexible and family friendly working practices for all workers from day one of employment
- oppose the use of fire and rehire practices

75.3. In order to ensure the highest standards of service quality we expect suppliers to commit to adopting Fair Work First in the delivery of this contract as part of a fair and equitable employment and reward package as a route to progressing towards wider fair work practices set out in the [Fair Work Framework](#).

75.4. The Scottish Living Wage Accreditation Initiative and the Living Wage Foundation recognise and celebrate the responsible leadership shown by Living Wage Employers and support employers to incorporate the Living Wage into organisational structures long term. Suppliers are encouraged to obtain Living Wage Accreditation and to sign the [Scottish Business Pledge](#).

75.5. The Scottish Government recognises pay as a clear way that an employer can demonstrate a commitment to their workforce, helping tackle in-work poverty alongside wider Fair Work First criteria. **We therefore require any workers engaged in the delivery of this framework agreement, and any subsequent call off contract, to be paid at least the real Living Wage.** More information can be found at the link below:

76.2. In delivering the Framework, the Contractor will be responsible for taking into account social, economic and environmental factors designed to maximise the involvement of the wider community. The Contractor will work with the Authority and Framework Public Bodies to maximise the value of Community Benefits delivered through the Framework including but not limited to:

4. Price Review

- 4.1.  - 4.3.2. not exceed the mean average change in the Bank of England currency exchange rate between the Commencement Date and Price Review Date or between the preceding Price Review Date and the applicable Price Review Date, and/or
 - 4.3.3. not be based solely on exchange rate movement unless the exchange rate change is greater than 5% between the Commencement Date and Price Review Date or between the preceding Price Review Date and the applicable Price Review Date.
- 4.4. In considering any Price Review proposal, the Authority will take into account the mean average movement of the Bank of England exchange rate for the relevant currencies during the previous 6-month period in question and the extent to which these currencies contribute to the overall pricing for Goods, Services and associated Software. The baseline Bank of England exchange rate will be the rate listed the day prior to the Framework Commencement Date.
- 4.5. The Contractor may also request a price review where the Contractor can establish to the satisfaction of the Authority that a substantial increase in the cost of performing its contractual obligations has arisen due to events which:-
 - 4.5.1. are beyond the Contractor's control;
 - 4.5.2. could not reasonably have been anticipated prior to conclusion of the contract;
 - 4.5.3. could not reasonably have been avoided or overcome; and

- 4.6. Consideration of any price review will be at the sole discretion of the Authority.
- 4.7. 5. Benchmarking

- 5.1. The Contractor must demonstrate to the Authority throughout the term of the Framework Agreement that the pricing available through the Framework Agreement is competitive and represents value for money.

- 5.2. The Authority reserves the right to benchmark or commission third party benchmarking of the Framework Agreement Pricing at any time in order to determine that they represent best value for money for Framework Public Bodies.
- 5.3. If the benchmark indicates that the pricing could be improved, the Contractor will be expected to review and improve the framework prices.
- 5.4. The Authority reserves the right to suspend or terminate the Contractor's appointment to provide Goods, Services and associated Software to Framework Public Bodies if the pricing is not competitive and does not represent value for money.
- 5.5. Any variations to the Price and benefits of work carried out by the Contractor to improve the products and services will be implemented by the Contractor (subject to relevant procurement regulations and the Framework Agreement) at no additional cost to the Framework Public Body.
- 5.6. The benefit of any work carried out by the Contractor to improve or update the Goods, Services or associated Software, or any alterations or variations to the Framework and/or Contract Price, or the provision of the Goods, Services and associated Software, which are identified as a result of continuous improvement or as a consequence of any benchmarking carried out by the Authority and/or Framework Public Body, will be implemented by the Contractor (subject to relevant procurement regulations and the Framework Agreement). This will be at no additional cost to the Authority and/or Framework Public Bodies.

6. Principal Catalogue

SCHEDULE 3 – AWARD PROCEDURES

1 Award Procedures

- 1.1. If a Framework Public Body has a requirement under this Framework Agreement, then it will award a call-off contract in accordance with the procedure in this Schedule and the requirements of the Regulations. All call-off contracts will be between the Framework Public Body and the Contractor.
- 1.2. Framework Public Bodies can access the Framework Agreement either by a direct award route or by conducting a further mini competition / quick quote with all Framework Contractors. The processes which will be followed under each route are detailed below in sections 2 and 3.
- 1.3. All Call-off Contracts awarded through the Framework Agreement will be drawn up in accordance with Schedule 5 (Standard Terms of Supply). This will be amended to reflect the individual Framework Public Body (Purchaser), Contractor (Supplier), reference numbers, dates, etc. Specific requirements or variations will be recorded in the supporting Schedules, which may include details captured in the Order Form at Annex A. Where the Standard Terms of Supply schedules and/or Order Form have not been completed, the corresponding schedules from the Framework Agreement will apply.
- 1.4. Framework Public Bodies may award Call-off Contracts at any time up to and including the expiry date of this Framework Agreement, which may run well beyond the duration of this Framework Agreement.
- 1.5. In the event that a Framework Public Body makes an approach to the Contractor with a request for the supply of Goods and/or Services which are the same as or similar to the Goods, Services or associated Software available on this Framework Agreement, the Contractor shall promptly and in any event within five (5) Working Days of the request by the Framework Public Body and before the supply of the equivalent Goods, Services or associated Software, inform such Framework Public Body of the existence of this Framework Agreement and its ability to place orders for the Goods, Services or associated Software pursuant to it.
- 1.6. Framework Public Bodies will identify the appropriate route and period to be used for their call-off requirement.

2. Direct Award Route

- 2.1. Where a Framework Public Body is able to determine which Contractor offers best value for money (quality, price and other areas e.g. interoperability), using the Contractor's Catalogue or web portal to identify the part number details and price for their requirement, they can simply place an Order with the successful Contractor in accordance with the Ordering Procedures and Order Form and in accordance with Schedule 5 (Standard Terms of Supply). The Framework Public Body needs to ensure that the direct award is compliant with procurement regulations.
- 2.2. Framework Public Bodies may choose to utilise their own Purchase Order document but the form must clearly state the resulting purchase is under the Managed Print

Solutions Framework (SP-21-046) and that the framework Call-Off Contract Terms and Conditions apply to the procurement.

3. Mini Competition

- 3.1. Framework Public Bodies reserve the right to hold a further mini competition with all of the Contractors on the Framework Agreement to determine which Contractor offers best value for money, in terms of price and quality. It is expected that all high value, complex and solution based requirements will be subject to further competition. This is as outlined in the Ordering Procedures and Order Form and in accordance with Schedule 5 (Standard Terms of Supply).
- 3.2. Contractors will take part in further competitions in accordance with this Schedule 3 (Award and Ordering Procedures) and there will be an expectation on Contractors to respond to all requests to participate.
- 3.3. Contractors will be required to maintain records of all mini competition requested under this Framework Agreement including details of the response, pricing and any awarded contracts. At the request of the Authority, Contractors will be required to report on the mini competition and subsequent awards as soon as applicable and as part of any review meetings. Contractors, upon request of the Authority, should also make available a copy of individual mini competition responses.
- 3.4. The Framework Public Body will develop a specification, which reflects the statement of works that the Contractor will be expected to perform, and not just for the purposes of enabling Contractors to respond and selecting a competitive Contractor.
- 3.5. Framework Public Bodies calling off from the Framework Agreement through a mini-competition may supplement the terms of the Call-Off Contract and Call-Off Conditions with additional or varied terms and conditions provided they do not involve any substantial modifications to the Call-Off Contract or Call-off Conditions.
- 3.6. The Framework Public Body will invite all Framework Contractors to tender by issuing the specification to all Contractors on the Framework. This may be carried out using the Public Contracts Scotland system, or using other appropriate procurement processes.
- 3.7. The Framework Public Body will set a reasonable time limit for the receipt of the tenders, taking into account the complexity of the requirements, and keep each response received confidential until the expiry of the time limit.
- 3.8. The Framework Public Body must evaluate all responses submitted by the Contractors by applying the award criteria specified. The award criteria which can be applied to further competitions will cover both cost and quality of service and will be stipulated in the mini competition tender documentation. Please note that the weightings and specific criteria will be determined by the Framework Public Body and this may vary from the framework award criteria/weightings as it is dependent on the specific requirement.
- 3.9. The Framework Public Body will not be obliged to award any Call-off Contract.

4. Ordering Procedures

- 4.1. Where a Framework Public Body is unable to determine the information required to place an order the Framework Public Body shall be provided with a named Account Manager who will provide support including pre, during and after sales support, technical information and advice on all devices.
- 4.2. The Contractor must have an appropriate structure and process in place to manage new orders and change requests from any Framework Public Body.
- 4.3. The Contractor will be able to accept orders in electronic, paper or any other format as agreed between the Authority, Framework Public Bodies and Contractor.
- 4.4. The Framework Public Body and Contractor must work together to ensure that the full requirements (as per clause 3.4 above) have been clearly identified and will be reflected in the order raised by the Framework Public Body, either by the utilisation of Schedule 5 (Standard Terms of Supply) or completion of the Order Form at Annex A.
- 4.5. Where Schedule 5 (Standard Terms of Supply) or the Order Form are not used, Framework Public Bodies must still ensure that all the relevant clauses are included within their requirements and ordering documentation, and back to Schedule 5 (Standard Terms of Supply).
- 4.6. The Framework Public Body will be required to provide an order that refers to the Framework Agreement and details the Framework Public Body's reference number. The Contractor will include the Framework Public Body's reference number on all correspondence.
- 4.7. An order acknowledgement must be provided by the Contractor within 24 hours of an order being received from a Framework Public Body. Contractors must be able to provide this in electronic and paper format. Contractors must follow up with the Framework Public Body if additional clarification is required regarding the Goods, Services or associated Software ordered.
- 4.8. If the Framework Public Body has not clearly quoted their reference number then the Contractor will clarify this with the Framework Public Body and may, as a last resort, reject any orders which are not deemed appropriate or compliant.
- 4.9. No excess charges will be levied on the Framework Public Body where their reference number has not been supplied or where the Framework Public Body's reference number is not used throughout the provisioning process by the Contractor.
- 4.10. If applicable, Framework Public Bodies may request in the order that, prior to delivery, the product settings are pre-loaded with appropriate software and fully tested.
- 4.11. It is the responsibility of the Contractor to ensure that all Goods, Services and associated Software are supplied at the correct prices.

5. Standard Terms of Supply Order Form

- 5.1. The purpose of the Standard Terms of Supply Order Form (Order Form) is to provide the Framework Public Bodies with a structured format for capturing their print requirements.

- 5.2. The Order Form can be used for both direct award and mini competition, to ensure Contractors are provided with the relevant information to process an order or respond to a mini competition request.
- 5.3. Contractors can use the Order Form to respond to the Framework Public Body's requirements.
- 5.4. The completed Order Form can be countersigned by both the Framework Public Body and Contractor to form the Contract document. A copy of the Order Form can be found in Annex A.

SCHEDULE 4 – MANAGEMENT ARRANGEMENTS

1. Introduction

- 1.1. The successful delivery of this Framework Agreement will rely on the ability of the Contractor's Account team and the Authority developing a strategic relationship immediately following framework award.
- 1.2. To achieve this, there will be a requirement to adopt proactive framework management activities which will be informed by quality Management Information (MI), and the sharing of information between all Parties.
- 1.3. This Schedule outlines the general structures and management activities that should be followed during the Framework Period, both in terms of the Authority-Contractor relationship and the Contractor-Framework Public Body relationship.

2. Key Individuals

- 2.1. The Contractor and Authority will agree a number of Key Roles and Key Personnel and the Contractor must ensure the continuity of Key Personnel throughout the Period of the Framework Agreement. The Contractor is expected to identify and allocate a named dedicated Framework Manager resource for the framework.
- 2.2. The role of the Framework Manager will be to manage the overall Framework Agreement with the Authority and to ensure any contractual non-conformance is addressed. The Framework Manager will also be responsible for attending quarterly operational Governance Meetings with the Authority to feedback on consolidated MI and discuss opportunities for continuous improvement. They will be responsible for the management of the individual Call-offs and provide a Single Point of Contact (SPoC) for the Framework Public Bodies using the Framework Agreement.
- 2.3. On a mutually agreed basis the Framework Manager (or other appointed named deputy from the Contractor's organisation) will be required to meet with the Framework Public Bodies to ensure all their requirements are being met and to demonstrate the Contractor's ability to maintain, and improve delivery against KPIs throughout the Contract. The activities of the Framework Manager (and any other appointed named deputies) are fully inclusive within the costs provided in the document "Schedule 2 (Pricing) - Managed Print Solutions".
- 2.4. The Contractor shall provide a named Account Manager for each Framework Public Body, to proactively co-ordinate orders and provide comprehensive support and links between the Contractor and the Framework Public Body. The support must include pre, during and after sales support, technical information and advice on all Goods, Services and associated Software. Where a Framework Public Body has an existing Account Manager in place with the Contractor, the Contractor should, where possible, offer the option of retaining this Account Manager.
- 2.5. The Contractor will be required to produce and maintain an organisation chart for the Contract and Account Management structure for this Framework Agreement which details the escalation route for each of the areas. Clear escalation routes should be identified for the provision of Goods, Services and associated Software and achieving the KPIs within this Framework Agreement in line with the governance process.

3. Meetings

- 3.1. It is the intention that an implementation meeting will be held with each successful Tenderer prior to the Framework Commencement Date in order to establish the Framework Management

approach and agree the timetable for producing all Deliverables required for Framework Commencement.

- 3.2. Further implementation meetings should be supported by the Contractor as required.
- 3.3. Annual and quarterly governance meetings will be established between the Authority and the Contractor and separately with Framework Public Bodies, as required.
- 3.4. The purpose of the governance meetings will be to address operational issues such as achievement of Key Performance Indicators (KPIs), utilisation of the Framework Agreement, realisation of savings and benefits, and opportunities to market the Framework Agreement more effectively. These will be attended by the Framework Manager and appointed representatives of the Authority and specific Framework Public Bodies invited as appropriate.
- 3.5. Conference calls may be held in between governance meetings to provide specific updates or address specific issues which require action before the next planned governance meeting.
- 3.6. In addition to regular meetings with the Authority, the Contractor is expected to develop relationships and meet regularly with nominated individuals within each Framework Public Body to ensure that the level of service provided on a local basis is satisfactory. Where specific problems are identified locally, the Contractor(s) will attempt to resolve such problems directly with the nominated individual within that organisation.

4. Communication & Marketing

- 4.1. The Authority will be the primary route for the communication of changes to the Framework Agreement. Contractors will however be expected to maintain regular dialogue with the Framework Public Bodies. The Authority must authorise any publication relating to the Framework, prior to distribution. This includes publications via social media.
- 4.2. The Contractor will allow all relevant information relating to the Framework to be published and distributed to Framework Public Bodies via the Authority's secure website.
- 4.3. All Framework Public Bodies will be strongly encouraged to support the Framework.

5. Buyer's Guide

- 5.2. Contractors will be required to support the production of the Buyer's Guide as requested.

- 6.3. The Contractor will ensure that the Account Manager or equivalent senior representative attends all implementation meetings. The Contractor's representative must be empowered to make decisions on behalf of the Contractor.

7. Management Information

- 7.1. The information and level of detail will be agreed between the Authority and/or Framework Public Body and the Contractor. The Contractor will be required to develop and incorporate agreed requirements into the database at no cost to the Authority or Framework Public Body.
- 7.2. On a quarterly basis, this standard MI will be provided both to the Authority and, if requested, to Framework Public Bodies. Reports should be submitted to the Authority within 10 Working Days of the end of each quarter, unless agreed with the Authority otherwise. The Authority and the Contractor(s) will look to develop and continuously improve the MI throughout the term of the Framework Agreement.
- 7.3. MI will be required in various formats to cover a number of different requirements, which are described in more detail below. These will be submitted in a format agreed by the Authority and/or Framework Public Body.

61. Force Majeure

61.1. Neither Party is liable to the other Party for any delay in performing, or other failure to perform, its obligations under the Contract to the extent that such delay or failure is a result of Force Majeure. Nonetheless, each Party must use all reasonable endeavours to continue to perform its obligations under the Contract for the duration of such Force Majeure. However, if Force Majeure prevents either Party from performing its material obligations under the Contract for a period in excess of <3 months>, either Party may terminate the Contract with immediate effect by notice.

61.2. Any delay or other failure by the Supplier in performing its obligations under the Contract which results from any failure or delay by a Supplier Representative is only to be regarded as due to Force Majeure if that Supplier Representative is itself impeded by Force Majeure from complying with an obligation to the Supplier.

61.3. If either Party becomes aware of Force Majeure which gives rise to, or is likely to give rise to, any delay or failure on its part as described in clause 61.1, it must immediately notify the other Party of the Force Majeure and the estimated period for which the failure or delay is to continue.

61.4. The only events that afford relief for failure or delay under the Contract are Force Majeure events.

62. Dispute Resolution

62.1. The Parties must attempt in good faith to resolve any dispute or difference between them arising out of or in connection with the Contract including any variation regarding its existence, validity or termination «F54: in accordance with the Management Arrangements».

application of either Party. The seat of the arbitration shall be in Scotland. The language used in the arbitral proceedings shall be English.

62.3. Any arbitration under clause 62.2 is subject to the Arbitration (Scotland) Act 2010.

63. Severability

63.1. If any provision of the Contract is held invalid, illegal or unenforceable for any reason by any court of competent jurisdiction, such provision is severed and the remainder of the provisions of the Contract continue in full force and effect as if the Contract had been executed with the invalid, illegal or unenforceable provision eliminated.

64. Waiver and Cumulative Remedies

64.1. Any failure of either Party to insist upon strict performance of any provision of the Contract, or the failure of either Party to exercise, or any delay in exercising, any right or remedy does not constitute a waiver of that right or remedy and does not cause a diminution of the obligations established by the Contract.

64.2. Accordingly, no waiver is effective unless it is expressly stated to be a waiver and communicated to the other Party in writing in accordance with clause 12 (Notices).

64.3. A waiver of any Default is not a waiver of any subsequent Default.

64.4. The rights and remedies provided by the Contract are cumulative and may be exercised concurrently or separately, and the exercise of any one remedy is not to be deemed an election of such remedy to the exclusion of other remedies.

65. Termination Rights

65.1. The Purchaser may terminate the Contract by notice to the Supplier with immediate effect if the Supplier commits a Default and:

65.5.
