Annex G Consultation Questionnaire

The case for change

**Question 1:** Is the proposal to focus initially, after legislation is enacted, on improving outcomes for older people, and then to extend our focus to improving integration of all areas of adult health and social care, practical and helpful?

Yes ☑ No ☐

Comments I think what is meant by integration needs to be clearly set out. The key evidence on integration, what works and what does not (structural) needs to be laid out and adopted going forward

Outline of proposed reforms

**Question 2:** Is our proposed framework for integration comprehensive? Is there anything missing that you would want to see added to it, or anything you would suggest should be removed?

Yes ☑ No ☐

Comments focus less on structure and more on partnership working to achieve common outcomes at both a strategic and operational level

National outcomes for adult health and social care

**Question 3:** This proposal will establish in law a requirement for statutory partners – Health Boards and Local Authorities – to deliver, and to be held jointly and equally accountable for, nationally agreed outcomes for adult health and social care. This is a significant departure from the current, separate performance management mechanisms that apply to Health Boards and Local Authorities. Does this approach provide a sufficiently strong mechanism to achieve the extent of change that is required?

Yes ☑ No ☐

Comments

**Question 4:** Do you agree that nationally agreed outcomes for adult health and social care should be included within all local Single Outcome Agreements?
Governance and joint accountability

Question 5: Will joint accountability to Ministers and Local Authority Leaders provide the right balance of local democratic accountability and accountability to central government, for health and social care services?

Yes ☑ No ☐

Comments possibly not, it still seems very health and LA dominated with the voice of the independent, third and service users not featuring. If you want true partnership the independent, third and service user reps need to be supported to engage and the playing field needs to be level.

Question 6: Should there be scope to establish a Health and Social Care Partnership that covers more than one Local Authority?

Yes ☑ No ☐

Comments in smaller geographical areas with smaller populations yes

Question 7: Are the proposed Committee arrangements appropriate to ensure governance of the Health and Social Care Partnership?

Yes ☑ No ☐

Comments no, there seems is an imbalance with LA and Health having a greater and more powerful voice

Question 8: Are the performance management arrangements described above sufficiently robust to provide public confidence that effective action will be taken if local services are failing to deliver appropriately?

Yes ☑ No ☐

Comments
Question 9: Should Health Boards and Local Authorities be free to choose whether to include the budgets for other CHP functions – apart from adult health and social care – within the scope of the Health and Social Care Partnership?

Yes □ No ☐

Comments

Integrated budgets and resourcing

Question 10: Do you think the models described above can successfully deliver our objective to use money to best effect for the patient or service user, whether they need “health” or “social care” support?

Yes □ No ☐

Comments it depends, if it is outcome focused, if all sectors can participate on an equal footing perhaps

Question 11: Do you have experience of the ease or difficulty of making flexible use of resources across the health and social care system that you would like to share?

Yes □ No ☐

Comments

Question 12: If Ministers provide direction on the minimum categories of spend that must be included in the integrated budget, will that provide sufficient impetus and sufficient local discretion to achieve the objectives we have set out?

Yes □ No ☐

Comments

Jointly Accountable Officer
Question 13: Do you think that the proposals described here for the financial authority of the Jointly Accountable Officer will be sufficient to enable the shift in investment that is required to achieve the shift in the balance of care?

Yes ☑ No □

Comments

Question 14: Have we described an appropriate level of seniority for the Jointly Accountable Officer?

Yes ☑ No □

Comments

Professionally led locality planning and commissioning of services

Question 15: Should the Scottish Government direct how locality planning is taken forward or leave this to local determination?

Yes □ No ☑

Comments determine locally

Question 16: It is proposed that a duty should be placed upon Health and Social Care Partnerships to consult local professionals, including GPs, on how best to put in place local arrangements for planning service provision, and then implement, review and maintain such arrangements. Is this duty strong enough?

Yes □ No ☑

Comments the net cast needs to be wider than GPs

Question 17: What practical steps/changes would help to enable clinicians and social care professionals to get involved with and drive planning at local level?

Comments to be valued and supported to have the confidence to participate and feel that what they have to offer will be heard
Question 18: Should locality planning be organised around clusters of GP practices? If not, how do you think this could be better organised?

Yes ☐ No ☐

Comments

Question 19: How much responsibility and decision making should be devolved from Health and Social Care Partnerships to locality planning groups?

Comments

Question 20: Should localities be organised around a given size of local population – e.g., of between 15,000 – 25,000 people, or some other range? If so, what size would you suggest?

Yes ☐ No ☐
