- Number of suppliers using solution: 18
- Number of invoices processed through solution to date: 25,650 (March 2016)
- Possible savings to date: £208,534 (March 2016)

Gary Corrigan (Director at TT Testing Ltd). "As a company we have found the eInvoicing solution to greatly improve the whole process. It has been very easy to implement and a lot better to send invoices by email rather than through the post. We get an email delivery receipt straight away and therefore know that all invoices are reaching the correct destination rather than posting them and hoping that they don't get misplaced. It's a lot quicker from start to finish and we are very happy with the process and solution".

Merle Stevenson (System & Business Development Officer at West Lothian Council) "TT Testing have been issuing invoices to West Lothian Council through the Scottish Government solution since coming on board as part of the pilot in May 2013. They have been very accommodating and were prompt to resolve any minor issues experienced in the early days. Following the official launch of the solution in October 2014, TT Testing have continued to transmit invoices in the correct format enabling efficient invoice processing and on time payment by the council."
