

Core Group Report – January 2020

Date: 04 February 2020.

This report was produced using OIE data.

Deteriorating	No Change	Improving	Undetermined
Situation is deteriorating and / or there is an increased risk to the UK	Update does not change the disease risk for animal health	Situation is improving or seasonal risk is decreasing	New incident or emerging disease / threat with unknown risk to UK

Foot and Mouth Disease

Low risk – no change

In January, FMD outbreaks were reported: serotype O in Israel (9); serotype SAT 2 in Namibia (6), Rwanda (1; not typed), serotype SAT 1 in South Africa (2).

Highly Pathogenic Avian Influenza

Very high risk for wild bird incursion – deteriorating

In January, in **EUROPE** outbreaks of **HPAI H5N8** were reported in domestic poultry in Czech Republic (4), Denmark (1), Finland (1), Italy (1), France (264), Germany (26), Hungary (3), Lithuania (1), Netherlands (1), Poland (13), Russia (1), and Sweden (2). HPAI H5N8 was also reported in wild birds in Denmark (15), Germany (26), Hungary (1), Italy (4), Ireland (1), Lithuania (3), Netherlands (1), Norway (3), Poland (2), Romania (1), Russia (2), Spain (1), and Sweden (2). **HPAI H5N5** was reported in domestic poultry in Belgium (1), Germany (1) and Sweden (1). HPAI H5N5 was also reported in wild birds in Denmark (1), Germany (13), Romania (5), and Slovakia (1). **HPAI H5N3** was reported in wild birds in Germany (3) and Ireland (1). **HPAI H5N1** was reported wild birds in Italy (1). **HPAI H5N4** was reported in wild birds in Germany (1). **HPAI H5Nx** was reported in wild birds in Belgium (4). In **ASIA**, outbreaks of **HPAI H5N8** were reported in domestic poultry in India (9), Iran (7), Iraq (1), Japan (8), Kuwait (1), Nepal (1), South Korea (47). HPAI H5N8 was reported in wild birds in China (1), Hong Kong (1), India (5), Israel (1), Japan (3), South Korea (87), **HPAI H5N1** was reported in poultry in Cambodia (1), India (4), and Vietnam (6), and in wild birds in India (1). Other reports included **HPAI H5N5** in poultry in Taiwan (6), and **HPAI H5N6** in poultry in Vietnam (5). In **AFRICA**, **HPAI H5N1** was reported in poultry in Senegal (1) and **HPAI H5N8** in ostriches in South Africa (1).

African Swine Fever

Medium risk – no change

In January, in **Europe**, reported outbreaks of ASF in domestic pigs have continued in Romania (28), Russia (9) and Ukraine (2). Reports of ASF in wild boar continue in Germany (38), Hungary (616), Latvia (29), Romania (40), and, Russia (5). **Elsewhere**, outbreaks of ASF in domestic pigs were reported in China (1) and South Africa (6).

Classical Swine Fever

Very low risk – no change

In January, Japan reported two outbreaks in domestic pigs. There were no cases among wild boar. Elsewhere, there were no other reports of CSF.

Bluetongue

Low risk – no change

In January, in **Europe**, there were cases of **BTV-8** in Belgium (1), and of **BTV-4** in Bulgaria (1), Croatia (1) and Romania (2). Elsewhere, there were no other reports of BTV.

Newcastle disease

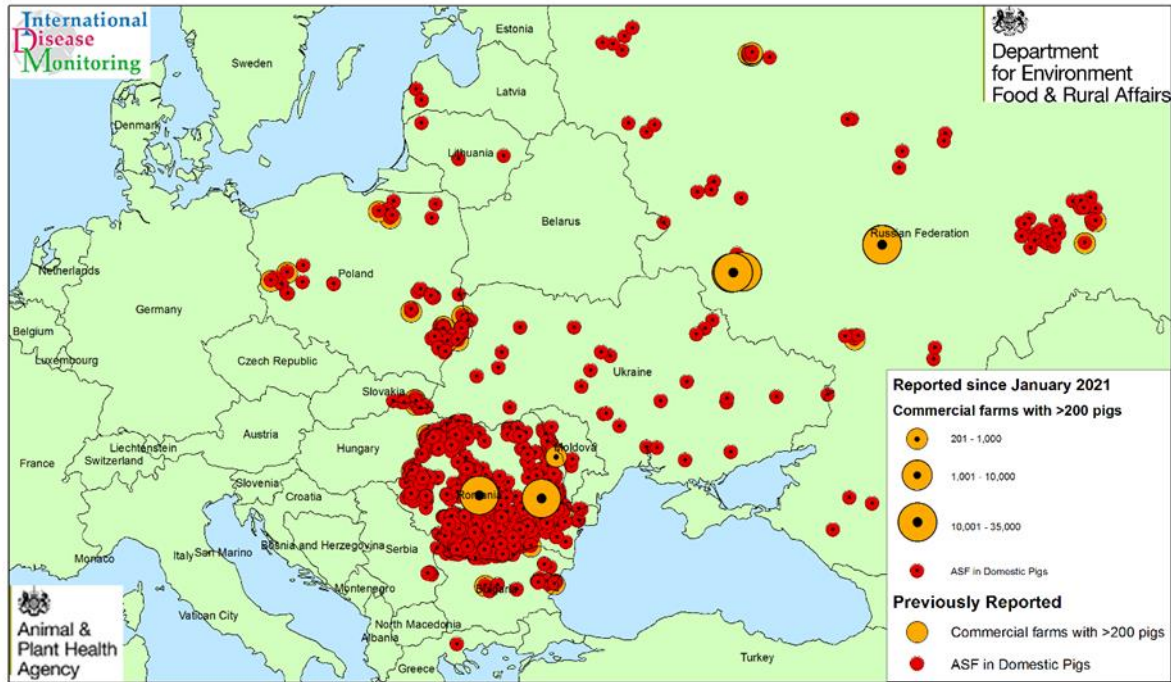

Low risk – no change

Nothing to report in January.

African Horse Sickness

Very low risk – no change

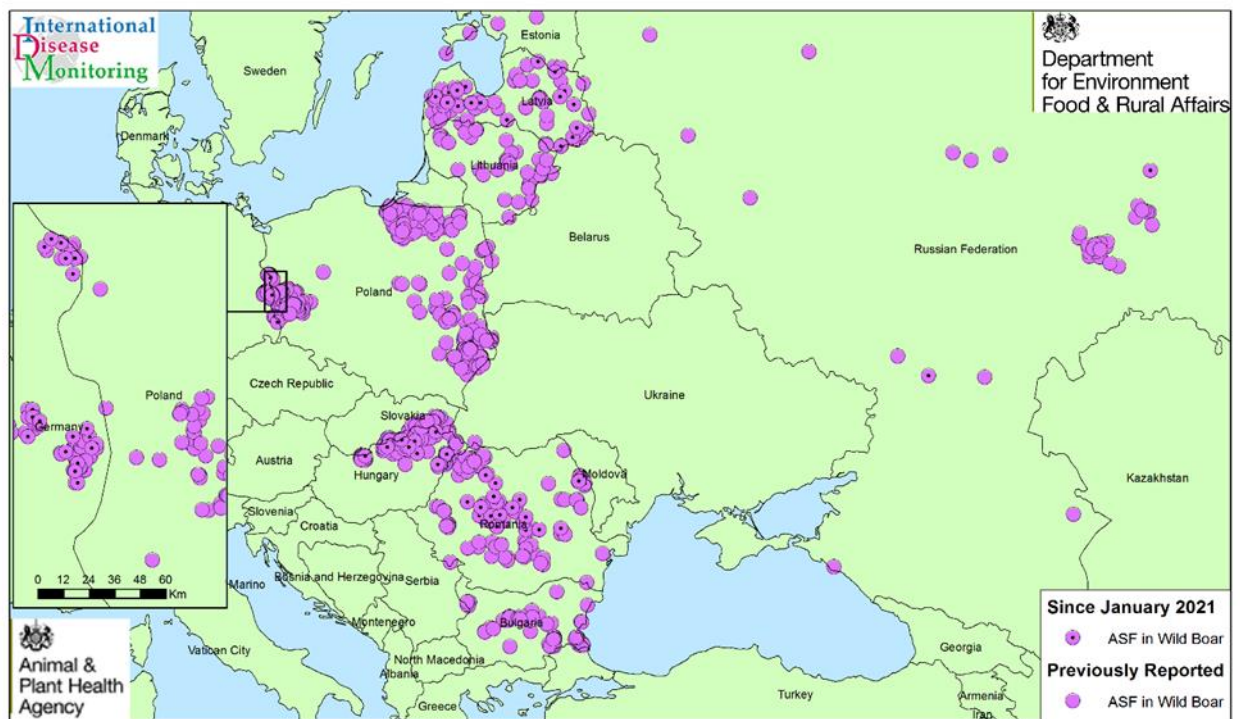

Nothing to report in January.
