#### Notes:

References to features in the geographical descriptions are those shown on the 1:50,000 Ordnance Survey Landranger map series.

<sup>1</sup> These designations have no seaward buffer as they do not extend as far as MLWS due to the extent of the tidal sands or mudflats.

<sup>2</sup> These designations have no associated foreshore as they occur in fresh water.

#### Basic definitions:

Foreshore – area between Mean High Water Springs (MHWS) and Mean Low Water Springs (MLWS).

Seaward buffer – this covers the area of sea extending seaward from MLWS.
