#### Notes

\* Values for 21 June and 22 June are based on payment initiated but not yet paid due to a technical issue with the Funding Certificate (affecting making payments). This has now been fixed today (22/06) and these payments will be completed within 24 hours with no delay to meeting the end June deadline

\*\* Still finalising the denominator – working on an assumption of €450 million (% progress could change depending on that analysis). 95.24% = €429 million; 90% = €405 million; 85% = €389 million; 80% = €360 million
