

FOI Review – Fol/17/01556

Table & timeframe of outstanding Windows 2003 servers

Current Total 35

There are two categories in the table below:

Group 1 - Systems that are low risk as they are internal, limited access or have no personal data

Group 2 - systems we cannot release data on as they are more sensitive and we need to prevent increasing any vulnerability.

No	Name	Detail
	Group 1	
11	Legacy policy servers	Legacy intranet servers. Replacement system live. Information being migrated. No external access.
3	Internal printing servers	Mainly used for the printing to custom stationary. No external access, limited users.
3	Communications system servers	Legacy. Limited access.
17	Sub total	
	Group 2 – (exclusions)	
18	Sub total	
35	TOTAL Servers	

Timeframe

The present planned timeframe for resolving Groups 1 and 2 above is from August 2017 to early 2018. Whilst most systems are resolved before end 2017, the exact dates depend at times on third party and procurement activities.
