Alan

Thanks for our meeting this afternoon.

Please find attached a draft for your review. You will appreciate at this stage, I am reluctant to be specific on numbers. Let me know if you wish me to consider changes.

Regards

David

CAPITAL STIMULUS FUNDING 2016/17 – 3.5M

IRH Boilerhouse Project & [OUT OF SCOPE] Project

The following is a summary of community benefits measured against the £3.5m investment. These projects are advancing at a pace, however some of the plant required [OUT OF SCOPE] as a long lead time due to the complexity of the install.

In Most of the areas GG&C is exceeding the target and it is hoped by the end of the project all criteria will have been met or exceeded.

The overall outputs delivered from this investment will be continually monitored with regular performance reported as required.

David

Thanks for this. No doubt at some stage we will be asking you what the job/economic impact was of this investment, so can you consider what monitoring arrangements you need to put in place in order to allow you to collate that information.

Subject: RE: Capital Stimulus

Alan

I am meeting Robert Calderwood tomorrow morning with Alan to discuss the Board's Capital Plan and the award for capital stimulus. Could you please advise on the process to identify both the IRH and [OUT OF SCOPE] for capital stimulus investment and, an indication of the economic / employment metrics that you could be looking for in the future? Eg, X jobs/apprenticeships per £1M spent.

Regards

David

David

[WITHHELD UNDER s.30(b)(ii)]

In terms of what we are looking for, number of jobs/apprenticeships would be an obvious measure, but could you also include a note of how many hours/days activity it added? I don't want to add a level of complexity or bureaucracy to the process, but anything you can think of which demonstrates that this was a good investment would be helpful.

Subject: RE: IRH Oncology Unit

Hi Charlotte, apologies for the delay with this one, please see comments below:

The Oncology Unit at Inverclyde Royal Hospital is not closing and will continue to provide services for patients with a range of cancers as well as non malignant Haematological conditions. There have been some changes to a Consultant clinic that may have prompted this query, we would be more than happy to contact this patient and discuss any concerns they may have if they are happy for their details to be shared.

I trust this is helpful but please let me know if you need anything further.

Kind regards.

G

Hello Gillian

We have received correspondence complaining that the cancer clinic at the Royal Inverclyde Hospital is going to be closed as part of cut-backs – the story was in the Greenock Telegraph on 1 November.

We have previously received concerns related to this and the Board's reply was 23 September – see below for ease.

Before we reply it would be appreciated if you could confirm that the position is still as set out below. Would also be helpful if you could set out what the changes to the consultant clinic (as noted below) are. The person writing is not a patient, just unhappy that the clinic is closing.

Grateful for reply by close of play next Thursday.

Thank you.

Hello Gillian

Just following up from my phone call. Here is the bit from the letter making reference to oncology services and stroke services being considered for closure at IRH:

“Our short term concern is the loss of the birthing units - but longer term, we fear for the future of our hospital and that in 15 years we will be discussing its closure completely - oncology services and stroke services appear to be on the agenda for closure - what next”?

I think Charlotte contacted you to ask for a contribution to address these points however I can't see the reply received and it would be helpful if you could re-send to me.

Thank you.
