Hi ██████████,

Thanks for the heads-up, I was in this property on Tuesday, and never noticed this – must have stepped over it. I highlighted something similar to ██████████ after finding a couple of floor openings in other properties (now made safe); although they hadn't been covered with cardboard.

Much appreciated

**Importance:** High

Hi ██████████

See correspondence below from BEAR Scotland and please advise your surveyors to be vigilant where there is debris / cardboard on floors. Grateful if you would confirm receipt and let us know if you have come across any similar issues?

Thanks

Hi ██████████

Please see below an incident that happened on site yesterday during one of the clearances. We are currently completing an investigation into the incident and will provide our report on completion.

Although the injuries to the operative were minor the concern is over the hidden opening that had been left in the floor. Could you alert Environtec to this possible danger for during their asbestos survey and any others that may be entering this property.

Regards,

██████████ MRICS
