Notes:

Statistics from Police Scotland

Date Period: 01/01/2010- 31/12/2019

Date Extracted -17 November 2020

Please note that the information provided is based on the current figures available. The following are potential reasons for an accident not appearing on our system:

- Transport Scotland only holds accident information which is provided to us by Police Scotland.
- Transport Scotland does not hold information relating to damage only accidents (i.e. not involving an injury).
- Transport Scotland only holds accident information for the trunk road network.
- The accident information Transport Scotland holds is subject to change. E.g. we receive late returns from Police Scotland, who are responsible for recording details of injury accidents.
- Annual Scottish accident figures are published by Transport Scotland on a yearly basis and can be found by entering Reported Road Casualties Scotland into your search engine.

It should be noted that a number of the fatalities recorded occurred at locations which were part of the trunk road network at the time of the accident. As a result of changes to the network during this ten year period, some accidents recorded on the trunk road network may now be located on roads which have subsequently been de-trunked and now form part of the local road network under the responsibility of the local authority.
