

**Transocean Winner – High Level Review of ROV video (14 Sep 2016, [REDACTED])
Broad Bay - Load out location and Current location**

Video reference number	Time of observation	Observation
LOAD-OUT LOCATION		
20160909-084103	08:49:08	? Burrows or stones - no life
20160909-085304	N/A	Sandy/gravelly/stony - no life and no striations
20160909-095306	N/A	26 m depth, stony/sandy, turbid – no life
20160909-130224	N/A	Sandy/stony – no life, desert-like
20160909-140226	N/A	Sandy/stony – no life
20160909-150226	N/A	Sandy – no life
20160909-153622	N/A	Sandy/gravelly/stony – no life
20160909-163624	N/A	Sandy/stony – no life
20160909-173624	N/A	No life
20160909-183624	N/A	Sandy/stony – no life
20160909-193625	20:00:14 to 25 sec	Shoal of juv. Fish, natural ripples in sand, weed
20160909-203625	N/A	Too bright, couldn't discern anything
20160909-213625	N/A	Stony – starfish only life
20160909-223625	N/A	Stony, dark, 27 metre depth
20160910-001224	N/A	Dark, lot of bubbles, couldn't see
20160910-011242	N/A	Stony/gravelly – no life
20160910-021242	N/A	Stony/gravelly – no life
20160910-031243	N/A	Sandy/stony – no life
20160910-041243	N/A	Sandy – no life
20160910-051243	05:12:47	A fish – stony/sandy
20160910-061243	07:03:20	? seaweed
20160910-071243	07:20:17 07:56:00	? seaweed, 26 metres depth Natural ripples in sand
20160910-081243	N/A	Stony/gravelly – no life
20160910-912243	N/A	Sandy – no life
20160910-094743	N/A	Sandy, no life – 26 metres depth
CURRENT LOCATION		
20160909-010301	01:28:56 01:31:47 01:33:68	Lots of juvenile fish – shoal, sandy Lots of fish More fish
20160909-020313	02:12:35	More fish
20160908-213642	21:55:06 22:17:50	Sandy/gravelly, natural ripples in sand? Juvenile fish
20160908-223644	22:36:50 22:45:56 23:12:34	Mass of juvenile fish Ripples in sand Thruster?

Note - Did not review footage that did not have coordinates (video references 20160904-124002, 132729, 132856, 151001) and footage that was queried as having maerl beds – previously reviewed by MSS. When stating “no life”, this is a reference to no observed fauna.

Summary

Load-out location – Very little life observed, stony/sandy/gravelly substrate, typically depth range 25 to 27 metres. No debris on sea bed.

Current location – Sandy substrate, shoals of juvenile fish, ripples in sand. No debris on seabed.
