Notes:

All above figures represent an average daily traffic flow on a monthly basis, the data has been presented in this way to allow assessment of any seasonal variations.

The above numbers represent the sum of both directions of vehicles passing each of the counter locations.

A blank in the table is due to no data being available for that particular date and location.

Traffic flows in some months of 2020 appear very different to other periods due to the Covid-19 travel restriction periods.
