

## Annex A

Purple line shows the extents of the Scottish Ministers land

The purple line shows the extent of the trunk road on the main line. However, all slip roads leading off and onto Hermiston are inspected and maintained as sections of trunk road.

In terms of winter maintenance, our Operating Company, BEAR Scotland, treat the A720 up to Gogar Roundabout as their winter vehicles have to travel on that section of road anyway.

**A720 Edinburgh City Bypass** from its junction with the A1 at and including Old Craighall Roundabout Edinburgh leading generally westwards for a distance of 22 kilometres or thereby to a point lying to the north of its junction with the M8 at Hermiston Interchange Edinburgh.

**M8/A8/A8(M) Edinburgh – Greenock Trunk Road** from its junction of the A720 at and including Hermiston Roundabout Edinburgh leading generally westwards for a distance of 41 kilometres or thereby to the junction of the A8 with the M8 at Newhouse, including that part of the said Trunk Road branching generally north-eastwards west of Edinburgh for a distance of 2 kilometres or thereby to its junction with the M9 south of Newbridge Roundabout Edinburgh.
