1 INTRODUCTION

1.1 This report results from a Stage 1 & 2 Road Safety Audit carried out in accordance with GG 119 Road Safety Audit on the following scheme:

A9 DRUMOCHTER SOUTH
VRS

at the request of redacted 11(2) , who approved and issued a road safety audit brief as representative of the Overseeing Organisation, Transport Scotland.

1.2 The audit comprised of site visits and an examination of the documents provided by the Overseeing Organisation and listed in Appendix A.

1.3 The Audit Team membership approved by Transport Scotland (the Overseeing Organisation) for this audit was as follows:

Name redacted 11(2) Organisation BEAR Scotland
(Audit Team Leader and author of The Road Safety Audit Report)

Certificate of Competency (tick if applicable)

Name redacted 11(2) Organisation BEAR Scotland
(Audit Team Member)

Certificate of Competency (tick if applicable)

1.4 The audit took place at the Perth offices of BEAR Scotland Ltd during Wednesday 16th November 2022 and the site was visited on the same day. Conditions were as detailed in Table 1 below.

Day	Date	Times	Light	Weather	Surface
Wednesday	16/11/22	1300 - 1400	Daylight	Overcast	Damp
Traffic				NMU	
Moderate				No non-motorised users were present during the site visit.	

Table 1: Site Conditions at Time of Visit

1.5 The team has examined and reported only on the road safety implications

of the scheme as presented and has not examined or verified the compliance of the design to any other criteria.

Strategic Decisions

- 1.6 The audit brief references the Safe System approach of Scotland’s Road Safety Framework to 2030 as the strategic driver for the proposals contained in this scheme.

Response Report

- 1.7 A copy of the signed RSA Response Report, containing the Road Safety Audit Decision Log, indicating the acceptance or otherwise of any problem and / or recommendation and agreed RSA actions, should be issued to the RSA team, by the Overseeing Organisation within 30 days of receipt of the audit report.

Purpose of the Scheme

- 1.8 The scheme aims to improve roadside safety at this location by installing vehicle restraint systems within the central reserve. The northbound and southbound dual carriageways diverge from each other and a woodland area is situated in the centre reserve between the two carriageways. Other hazards such as culverts and embankments are also present in this area and require protection.
