Subject: RE: enquiries

Hi [Redacted],

Thanks, yes happy for you to respond along those lines in terms of when and whether an embargoed copy can be shared.

In terms of the ETSU work. I had a quick look at the minutes, and as there is a note to say they are potentially looking to publish the noise report in the new year, allowing time for the other publications to go out, I think it would be helpful to just clarify with BEIS that we are still working to a pre-Christmas publication. Ideally, if you could just share this info with BEIS rather than the wider group, that would be helpful.

Thanks for checking.

Subject: enquiries

Hi [Redacted],

There are a couple of enquiries sitting in the team mailbox about publication dates.

Given your emails are you happy with the following lines.

In terms of when will the onshore wind policy statement be published – in the

coming months

[Redacted]

In terms of going back to the noise working group – I additionally said it would likely be published w/c 19 December. I then updated the minutes to say it would be likely in January but the line to use in the minutes should say in the coming months. Given the link to the publication of the noise report by wsp which I think will cause some work, then it might be useful to go back to the steering group and clarify the publication date.

Are we able to clarify the publication date?

Kind regards

[Re
do
