Subject: RE: noise and wind turbines

Hi [Redacted],

Sorry for the late reply. Its [Redacted] in my team but she's not back until Tuesday. We financially contributed to this report and our position is Until such time as new guidance is produced, ETSU-R-97 should continue to be followed by applicants and used to assess and rate noise from wind energy developments.

Thanks and apologies again,

[Redacted]

Subject: noise and wind turbines

[Redacted]

I've just been to a local authority meeting with Environmental Health Officers (SPCCC) – my interest in is noise nuisance in homes – and wind turbine noise was raised and issues around this (I think this has been raised by Aberdeen Councils at previous meetings). It was noted that the guidance on noise of wind turbines was being reviewed at UK level (see link below), and the group was keen to understand more about the Scottish position on this, and interaction with Scottish planning.

Can you let me know who is leading on this for Scottish interests?

Thanks [Redacted]
