

## 'IBMM - Fireworks and Pyrotechnics Bill - Note - 6 August 2021'

### Timetable –

The timetable is compressed leading up to introduction, with the consultation closing on 15 August, post-consultation policy [redacted - s30(c)]. This leaves very little room for slippage.

The Bill will require an expedited timetable for its parliamentary passage if it is to have commenced by Bonfire Night 2022, with two measures (the proxy purchasing offence and restricting the days on which fireworks can be set off) in place for this date.

The principal risk identified to the timetable are late-running policy instructions due to stretched resources during ongoing stakeholder engagement.

[redacted – not in scope]

It was agreed that the Bill team would establish a critical path to map future activity to commencement in 2022
