

202400406406 - Annex A - A75 Personal Injury Accident Stats

The collision data below includes the number of personal injury accidents on the A75 trunk road between 1 January 2019 and 1 January 2024, inclusive

Year	Fatal Incidents
2019	2
2020	1
2021	2
2022	1
2023	1
2024*	0
Total	7

* Up to and Including 01/01/2024

Year	Injury Causing Incidents
2019	25
2020	24
2021	24
2022	24
2023	41
2024*	0
Total	138

* Up to and Including 01/01/2024

Please note that the information provided is based on the current figures available. The following are potential reasons for an accident not appearing on our system:

- Transport Scotland only holds accident information which is provided to us by Police Scotland.
- Transport Scotland does not hold information relating to damage only accidents (i.e. not involving an injury).
- Transport Scotland only holds accident information for the trunk road network.
- The accident information Transport Scotland holds is subject to change. E.g. we receive late returns from Police Scotland, who are responsible for recording details of injury accidents.
- Annual Scottish accident figures are published by Transport Scotland on a yearly basis and can be found by entering Reported Road Casualties Scotland into your search engine.
- From summer 2019, Police Scotland introduced a new system for recording traffic collisions. Due to improved recording and categorisation processes, it is expected that there will be an increase in the number of casualties and accidents on Scottish roads that are classified as serious. This increase would not reflect an actual change in the severity of accidents occurring on Scottish roads, but would instead reflect more accurate recording.
- Statisticians within the Department for Transport have devised a method for adjusting the road casualty figures to ensure that they can be compared over time on a consistent basis. Transport Scotland's Key Reported Road Casualties and Reported Road Casualties statistics publications will present both adjusted and unadjusted figures.
