5500028	Pumphreston and Uphall Station CPS	West Lothian	Primary	Yes	Yes	Yes	Visual in early 2000/2001	Visual	No				
5501326	Riverside Primary School	West Lothian	Primary	Yes	Yes	Yes	Visual in early 2000/2001	Intrusive	Yes	RAAC roof panels to the majority of the school; approximately 4,000m2.	Temporary propping installed in 2021 but RAAC deteriorated further resulting a full RAAC closure in April 2023. School was operational on site up until end June 2023 but was difficult with the reduced spaces; school moved into the old Beattie School from August 2023 and will remain there until a new school can be constructed. Although not ideal moving into spaces designed for a severe and complex needs facility, it's close in proximity and cheaper than temporary units. The nursery has been moved to Letham from August 2023.	Awaiting outcome of EEP Phase 3 for a joint Riverside and Letham school.	Although temporary propping was installed throughout the RAAC areas, due to the movement in the RAAC panels, this ended up moving the timbers below, therefore making them become unstable and the RAAC deteriorated to the point where some was crumbling away. Therefore WLC was left with no option but to close the full RAAC area upon structural engineer advise. Please note that temporary propping is only a short term fix and it's vital that if installed that it's undertaken correctly and directly fixed to the underside of the RAAC panels. There cannot be any gaps and it needs to be inspected for movement on a regular basis. If propping is installed then a long term strategy needs to be worked on in conjunction with this, in terms of replacing the RAAC panels in full. RAAC has a lifespan of 30 years so most buildings where RAAC is present in past this, note also that the recent ESTRUCT guidance advises that the if the bearing of the RAAC panels are less than 75mm then they are classed as a critical risk.
