Subject: RE: Geoengineering (Case Ref: JL46019)

Hi REDACTED

'Geoengineering and Solar Radiation modification being used by government bodies in the Borders' isn't for us. I'm not aware of any such live practice, far less in the Borders, but I'm cc'ing REDACTED to see whether he's aware of a team in SG that might be able to comment

REDACTED –adding you as you cover capture carbon but appreciate may be a little tenuous.

Another option is to see whether he have an SG contact with South of Scotland Enterprise. I can try to find a name if needs be.

Regards, REDACTED

Subject: RE: Geoengineering (Case Ref: JL46019)

Morning folks,

Appreciate that we are really busy just now.

Got a REDACTED querying on this MR case and whether it should be for us to take on.

I appreciate that I have dealt with cases in relation to Geoengineering in the past. With this referring to Solar Radiation modification as well, would we consider this as merely an extension of Geoengineering and we would answer on this (by our standard lines requesting them to contact the CAA) or as something separate from Geoengineering and therefore require input from elsewhere to answer on the Solar Radiation aspect of this case?

Case due up to PO on Wed 29 May

Thanks

REDACTED

Subject: FW: Geoengineering (Case Ref: JL46019)

Hi REDACTED

I've received the MACCS below about geoengineering. I think I've received this because it contains the word solar and I'm SG lead for solar PV. I'm in Onshore Renewables so I don't think this is for me. I had a look on Micase and see you have responded to similar correspondence before. Are you able to take this one? PO deadline is 29 May.

[MiCase - View Case 414205](#)

Many thanks

For the attention of the Cabinet Secretary for Rural Affairs, Land Reform, and Islands – Mairi Gougeon.

Dear Mairi,

I have been contacted by a constituent concerned about Geoengineering and Solar Radiation modification being used by government bodies in the Borders.

I would be grateful if you could shed light on any such projects being implemented in the Borders.

Thank you for your time.

Kind regards.

John
