Notes:

Statistics for Police Scotland

Date Period: 01/01/2020 - 08/05/2025

Date Extracted: 22/7/2025

Please note that the information provided is based on the current figures available. The following are potential reasons for an accident not appearing on our system:

- Transport Scotland only holds accident information which is provided to us by Police Scotland.
- Transport Scotland does not hold information relating to damage only accidents (i.e. not involving an injury).
- Transport Scotland only holds accident information for the trunk road network.
- The accident information Transport Scotland holds is subject to change. E.g. we receive late returns from Police Scotland, who are responsible for recording details of injury accidents.
- Annual Scottish accident figures are published by Transport Scotland on a yearly basis and can be found by entering Reported Road Casualties Scotland into your search engine.
- From summer 2019, Police Scotland introduced a new system for recording traffic collisions. Due to improved recording and categorisation processes, it is expected that there will be an increase in the number of casualties and accidents on Scottish roads that are classified as serious.
- Statisticians within the Department for Transport have devised a method for adjusting the road casualty figures to ensure that they can be compared over time on a consistent basis. Transport Scotland's Key Reported Road Casualties and Reported Road Casualties statistics publications will present both adjusted and unadjusted figures.

Weekday		JTC00012 - A9 - Dunblane By-pass (South)	JTC00068 - M9 South of Keir Roundabout
Year	Time	Average Traffic Flow	Average Traffic Flow

**Notes** All data extracted from National Traffic Data System on 16 July 2025  
All numbers are Hourly Average Daily Traffic figures - i.e. the total daily traffic at each location, averaged over each hour for the yearly periods shown.  
All numbers represent the sum of both directions of travel at each of the locations.  
A blank cell in the table denotes no data available for that date range/location.  
Each time denotes the start of the time period until the following hour, e.g. 08:00 captures 08:00-08:59

**Notes** Scales on the graphs vary, please be aware of this when comparing.  
 These are travel times averaged over yearly periods for the routes shown on the map attached.
