S38(1)b - personal information, this is very helpful even just so that when I am agreeing these grants I get some sense of whether they are making a difference? Understand the limitations of data, that early end is not failure, and not interested in names etc so anonymous is fine, but it's interesting to see this sort of breakdown. Every once in a while send me similar ta.

Copying in S38(1)b - personal information for interest.

**Subject:** Prison to Rehab Short Outcome Summary

Good afternoon Richard,

Apologies for the delay in getting this information over to you, however please find a short summary of Prison to Rehab outcomes from the current financial year.

We have had 77 funding requests for P2R placements from 1 April 2025 – present. 6 of which have been considered to have fully completed their agreed placement period.

Some placements are still ongoing, but for those placements that have ended early or did not begin at all, please see below some of the factors that have contributed to this:

### **Did Not Enter Placement**

- Multiple individuals decided not to enter the programme on the day of liberation or after being offered a placement.
- Common reasons: family illness, change of mind, early electronic release, involvement in other issues.

### **Self-Discharge / Early Exit**

- A significant number of placements ended early due to self-discharge.
- Reasons include:
  - Wanting to return home to family.
  - Receiving benefits payment.
  - Securing housing
  - Struggling with programme requirements
  - Breaches of contract or challenging boundaries.
  - Aggressive behaviour toward staff/residents.

### **Aftercare Planning**

- Many cases note aftercare plans or packages in place, even when individuals self-discharged.
- Some declined aftercare or did not wish to complete planning.

### **External Factors**

Scottish Ministers, special advisers and the Permanent Secretary are covered by the terms of the Lobbying (Scotland) Act 2016. See [www.lobbying.scot](http://www.lobbying.scot)

St Andrew's House, Regent Road, Edinburgh EH1  
3DG  
[www.gov.scot](http://www.gov.scot)

- Criminal justice issues (e.g., additional custodial sentence, parole delays).
- Family emergencies (illness, need to support partner).
- Administrative issues

As we do not receive information on individuals after they leave their placement (whether early or not), we cannot confirm whether they continue their recovery journey beyond rehab. For this reason, we try to avoid considering placements that end early as unsuccessful. However, this remains a grey area due to the lack of follow up data.

Hope this is helpful?

Thanks,

S38(1)b - personal information, thanks. Very much routine, for when you have time, but maybe just a quick summary whether there are any overall issues or themes, is it proving successful or things we need to sort. 1 page. Just headlines. Let me know if that's ok, and to repeat no rush.

R

Thanks Richard!

Sorry I did see this and meant to come back to you. In terms of outcomes, we receive these for every individual who access the P2R pathway. These are all saved into eRDM and there have been discussions on what should be done and/or who should have sight of these for reporting purposes, but no solution as of yet.

However, for ease of reference to each case, I make a *short* note on our excel tracking sheet which I can share with you? It's in a locked folder on eRDM for confidentiality purposes, but I can request that you are added to the permissions list so you are able to access it or I can send you a snippet of the outcomes we've received in the 25/26 FY so far?

Let me know what would suit and I'll get that sorted for you

Have a good weekend when it comes!

Content, thanks.

A few weeks back I asked about outcomes from this work. Sorry if you sent me something, if you did just remind me, but I would be interested in how this is all working (given recent interest of the CJ committee).

Have a great weekend.
