

Internet Safety Action Plan

Under children and families, the SNP committed to the following in their manifesto:

We will refresh our internet safety action plan, linking it to our strategy on digital participation, so that appropriate frameworks of training, support and information are in place for professionals and families, including children and young people

We are therefore currently working across government to update our internet safety action plan, ensuring it is linked to our Digital Participation strategy. We are also taking steps to ensure the refreshed action plan is linked to work being taken forward in schools. In addition to this, we will be engaging with key external stakeholders who will be crucial in the development of a refreshed action plan. The plan will be published by March 2017.

We have brought together the following stakeholders to develop this work:

<u>INTERNAL</u>	<u>EXTERNAL</u>
Cyber Resilience	Police Scotland
Digital Participation	CEOP
Learning Directorate	Respectme
Education Scotland	Young Scot
	NSPCC
	YouthLink Scotland
	Barnardos

Logic model

Following a meeting of the above group to agree aims on 3 October, a logic model has been drafted to inform a refreshed action plan on child internet safety. Following comments from the EAG, the logic model will be finalised at our second meeting on 15 November and shared with Ministers in December.

Looking at the logic model,

- Is there anything missing?
- Would you propose to change anything that is included?
- Could the outcomes be better linked/linked differently?
