Next Meeting

To be discussed – likely January 2021.

The meeting will be longer (2 hours) to allow for further strategic discussion.

DDG/20/4/1

Strategic Discussion

Chair's Update: Shannon Vallor will provide an update on developments of interest since the last meeting.

UK National Data Strategy (NDS): The UK NDS is an ambitious, pro-growth strategy that aims to drive the UK in building a world-leading data economy while ensuring public trust in data use. Published on 9 September, the NDS is a framework for action, and part of a conversation about supporting the use of data in the UK.

The UK Government is currently consulting on the NDS and would welcome views. Further details, including how to submit a response, are available on the NDS consultation page <https://www.gov.uk/government/consultations/uk-national-data-strategy-nds-consultation>.

Digital Strategy for Scotland: The Scottish Government is working in collaboration with the Improvement Service, COSLA and the Digital Office to deliver a refreshed digital strategy for Scotland.

A consultation on proposals for the refreshed strategy opened on 30 September; for more details, and to respond, see <https://consult.gov.scot/digital-directorate/digital-strategy-for-scotland/>.

For further information contact DigitalStrategyConsultation@gov.scot. Updates on progress and details of the consultation will also be available on www.twitter.com/digitalscots.

The consultation will run until 23 December, and it is intended to publish the finalised strategy in the New Year.

Scotland's AI Strategy: The steering committee were updated on progress with the consultation, public engagement programme and strategic theme working groups in mid-August. At that session members were also invited to consider options for taking forward work to develop the strategy.

The consultation and engagement programme reports were published in late September; an article outlining key outputs, and links to the reports themselves, can be found at <https://www.scotlandaistrategy.com/news/ask-listen-reflect-act>.

The working groups report will be published shortly. A programme of digital activities to promote work to date, such as an interview with Kate Forbes MSP, Cabinet Secretary for Finance, and a panel discussion event on 25 November, will run until the launch of the strategy next spring. More details can be found on the strategy website <https://www.scotlandaistrategy.com/>.

Gillian Docherty and Albert King will give a short update at the meeting.

DDG Next Steps: Questions to discuss -

- What are the implications of these developments for the DDG?
- Should the DDG review its Terms of Reference and work to date – such as the High Level Delivery Plan for Data – and consider and endorse recommendations on its future at the next meeting?
