Social care support
An investment in Scotland’s people, society and economy

- Shared agreement on the purpose of social care support
- Support that fits around a person
- Consistent experience and expectations
- Models of care and support
- Equity of experience and expectations across Scotland
- Change attitudes towards social care support
- Value the workforce
- Co-produce with people who use social care support, unpaid carers, and wider communities
- Workforce conditions and skills
- Our systems, processes and decision-making
- Our support across Scotland
- The way people access support
- The way people are supported
- Investment in care and support
- Commissioning and procurement
- Look at funding and investment
- Evaluate and learn from data and experience
- Based on human rights

The purpose and value of social care support and self-directed approaches

The way we value and understand social care support

Consistent experience and expectations
