

# COVID-19 Scotland daily update

*28 April, 2020*

## Overall update

Here is the daily report for COVID-19 in Scotland for Tuesday, 28 April 2020. For the full dashboard, including comparisons with other countries, please visit [here](#).

### Deaths:

The death toll is currently 1332.

The number of new deaths reported today was 70, which represents a 5.5% increase on yesterday's total.

The weekly ratio for new deaths measured over the last 7 days was 0.9, which is not significantly less than 1.

### Cases:

The total number of cases is currently 10,721.

The number of new cases today is 200, which represents a 1.9% increase on yesterday's total.

The weekly ratio for new cases was 0.9, which is significantly less than 1.

### Cases per capita (measured per 10,000 head of population):

The highest incidence over the last day was 0.6, which occurred in Greater Glasgow and Clyde.

The highest cumulative incidence is 30.6, which is in Tayside.

### Health Boards\*:

The largest increase in cases in absolute terms by health board was 73 cases, which occurred in Greater Glasgow and Clyde.

The largest relative increase in cases was 2.9%, which occurred in Greater Glasgow and Clyde.

The highest weekly ratio for new cases was 1.4, which occurred in Grampian, Shetland and Orkney. The 95% confidence interval does not include a ratio of 1.

### Tests:

The total number of tests reported is 51,499.

The total number of positive cases to date is 10,721.

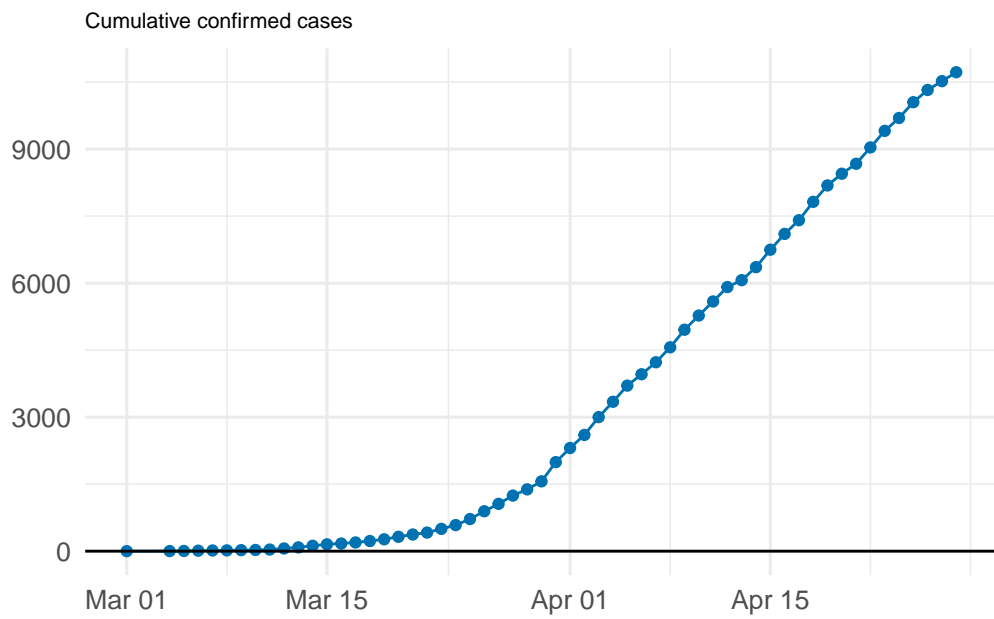

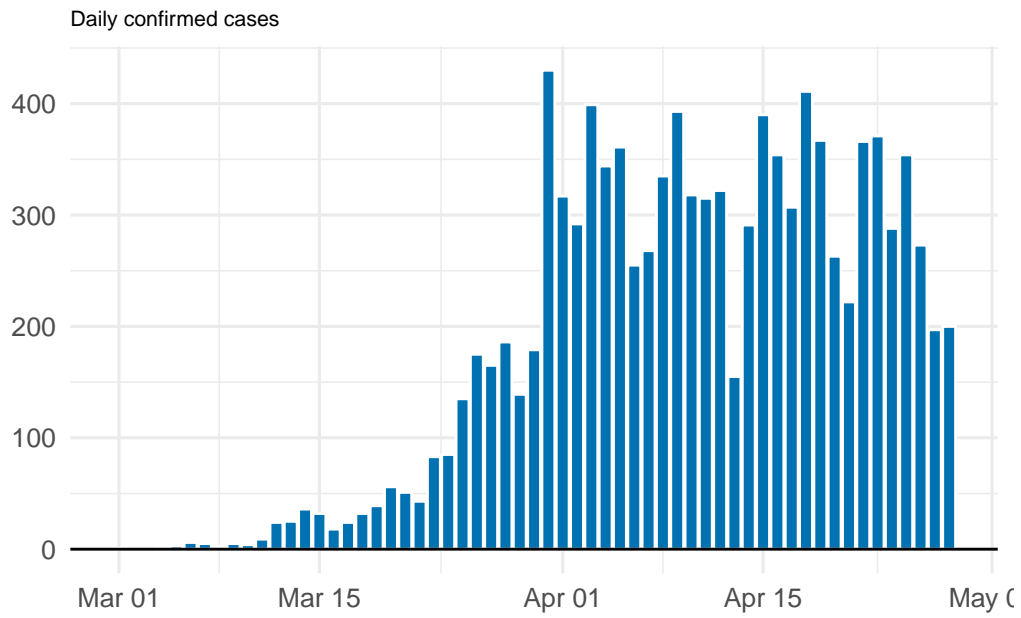

The percentage of tests which were positive is currently 20.8%.

\*To enhance graph readability and to account for cases being reallocated across health boards, the following health boards are grouped together: Grampian, Shetland and Orkney; Highland and Western Isles.

The data in this report are provided by Health Protection Scotland and published daily by the Scottish Government [here](#). This report has been compiled in collaboration between members of the [EpiGroup](#) and [EERA](#) groups at the University of Edinburgh.
