

ABSTRACT OF SCOTTISH AGRICULTURAL STATISTICS 1982 TO 2016

Notes on content

- 1 This publication contains data for the June Agricultural Census for the years 1982-2016.
- 2 Only those holdings above the threshold for classification as 'domestic' holdings are included. Figures for 1982 to 1989 include estimates for minor holdings based on the 1989 minor dataset.
- 3 In 1997, for the first time, areas given by farmers on their census questionnaires were accepted to more than one decimal place. As the figures in tables 1 to 9 and 11 to 12 are given to one decimal place, some of the totals in these tables may not be exactly equal to the sum of their constituent parts.
- 4 Minor revisions have been made to the published data.
Tables showing the extent of these revisions are available at:
<http://www.gov.scot/Topics/Statistics/Browse/Agriculture-Fisheries/revisions>
- 5 From 2009, data on land use was obtained from the **Single Application Form (SAF)**. In 2016 land data was taken from 23,700 holdings claiming basic payments scheme entitlement. This data has been combined with land use data from all other holdings, collected through June Census forms, to generate overall 2016 June census results. This development has led to a substantial reduction in statistical data collection and an overall improvement in the quality of land use statistics.
The use of SAF data has resulted in a **step change** in some of the land use results from 2009, especially for **rough grazing and grass**. This means that trends between 2008 and 2016 for these land use categories do not represent genuine changes in land use, but do represent differences in the way this data has been reported between 2008 June Census and 2009 to 2016 SAF. These trends should be treated with caution.
- 6 Statistical data on cattle populations have historically been collected through the June and December census in Scotland. In order to reduce the burden on survey respondents, data from the June 2013 (and in subsequent June and December collections) has been obtained through the Cattle Tracing System (CTS), an administrative data source held by the British Cattle Movement Service (BCMS) which records cattle movements across Great Britain. CTS data have been used to obtain figures for England and Wales since 2007.
Usable data from CTS is only available for Scotland from 2006. For comparability, tables containing data collected via the survey methods used up until June 2012 have been included. For those years where both census and CTS data are available, CTS data has been, on average, 3.2 per cent higher than that collected through the census.
Further information relating to the collection of CTS data can be found in Annex A of the Economic Report on Scottish Agriculture 2013

List of tables

Section	Table	Number
Land use	Total area of agricultural land	1
	Land tenure, fallow land and set-aside	2
	Cereals	3
	Other combine harvested crops	4
	Potatoes and aromatic, medicinal and culinary plants	5
	Forage area	6-7
	Vegetables for human consumption	8
	Soft and orchard fruit	9
	Glasshouse and protected crops	10-11
	Bulbs, flowers and nursery stock grown in the open	12
	Livestock	Cattle Totals - Cattle Tracing System (CTS) (2006-2016)
Beef cattle (1982-2012)		14-15
Dairy cattle (1982-2012)		16
Cattle totals (1982-2012)		17-18
Calves and store cattle bought/sold (1982 - 2012)		19
Sheep and goats		20
Horses, farmed deer and camelids		21
Pigs		22
Poultry		23
Labour		Occupiers and spouses doing farm work
	Employees	25-26
	Total workforce	27
Historical	Cattle, Sheep, Poultry and Pig figures	Annex 1

Table 1 - Total area of Agricultural land, 1982 - 2016

hectares

Year	Number of holdings (a)	Tillage (b) 1	Grass under 5 years old +2	Arable =3	Grass over 5 years old +4	Total crops and grass =5	Sole right rough grazing (c) +6	Sole right agricultural area (d) =7	Woodlands (e) +8	Other land (e.g. roads, yards and buildings) +9	Total area in sole occupation =10	Common grazing +11	Total area =12

2014	52,277	589,017.9	425,742.1	1,014,760.0	882,387.1	1,897,147.1	3,056,854.8	4,954,001.9	479,359.1	162,606.6	5,595,967.7	584,262.9	6,180,230.5
2015	52,303	592,697.9	212,963.7	805,661.6	1,127,963.8	1,933,625.4	2,949,099.8	4,882,725.2	524,026.2	169,668.5	5,576,419.9	584,247.0	6,160,666.9
2016	51,896	582,243.1	210,080.2	792,323.3	1,117,854.0	1,910,177.3	3,084,580.5	4,994,757.8	502,399.3	154,994.8	5,652,151.9	584,224.7	6,236,376.6

(a) Up to 2010 excludes Sheep Stock Clubs

(b) From 1993 to 2008, all set-aside land is included within Tillage (see also table 2).

(c) Includes deer forests.

(d) Equates with the EU measure of Utilised Agricultural Area (UAA) for holdings. For Scotland, the measure is column 7 plus column 11.

(e) Woodland contained within the agricultural holding.

(f) From 2009, step change using SAF data - see Note 5 in the "notes on content" for more details.

Table 2 - Land tenure , Fallow Land and Set-aside, 1982 - 2016

Year	Area rented			Area owned	Total area in sole occupation (f)	Fallow land (b)(c)			Set-aside (d)(e)
	From an outside concern (a)	From near relative or concern in which occupier has an interest (a)	Total			5 years or less	More than 5 years	Total

- (a) From 1996, area rented was collected as one figure.
- (b) From 2009, step change using SAF data - see Note 5 on page (v) for more details.
- (c) Fallow land 5 years or less and more than 5 years first collected in 2010.
- (d) From 1993, set-aside was collected as one figure. Previous years' set-aside figures were collected as fallow, woodland and non-agricultural land. Although these figures are available separately they have been added into the bare fallow, woodlands and other sections for the purposes of this document.
- (e) Set-aside entitlements under the Single Farm Payment scheme ceased in 2009.
- (f) From 2009, Total area in sole occupation no longer matches Total area in sole occupation in table 1. This is because land tenure and land use data are now sourced from separate systems. See Note 5 in the "notes on content" for more details.

(a) Oats first collected separately in 1995.

(b) Triticale first collected in 1987.

(c) Rye figure first collected in 2014 Area relates only to those holdings who have submitted a Single Application Form (SAF). SAF holdings account for around 90% of land area in Scotland.

(d) From 2009, step change using SAF data see Note 5 in the "notes on content" for more details.

hectares

- (a) Winter rape and spring rape first collected separately in 1988.
 - (b) In order to prevent disclosure of individual holdings, in 2009, 2012 to 2014, and 2016 a small area of linseed is added to the figure for spring oilseed
 - (c) Peas for combining first collected in 1984.
 - (d) Beans for combining first collected in 1994.
 - (e) Total combine harvested crops include total cereals (see table 3), flax and linseed.
 - (f) Areas deemed eligible of oilseed rape for industrial uses grown on set-aside land first collected in 1993 under the Arable Area Payments Scheme. Not collected from 2008.
 - (g) From 2009, step change using SAF data - see Note 5 in the "notes on content" for more details.
- : not available.

(a) Strawberries and Raspberries grown in glasshouses first collected in 2011

(b) Blueberries grown in glasshouses first collected in 2014

(c) Other fruit and vegetables grown in glasshouses, first collected in 2003.

From 2015 a small area of blackcurrants grown under cover were included with blackcurrants grown in the open to prevent disclosure of individual holdings

(d) Bedding and pot plants grown in glasshouses first collected in 1998.

(e) Hardy nursery stock grown in glasshouses first collected in 2002.

(f) Changes between 2010 and 2012 (owing to both the changes to the SAF in 2012 and the Census form in 2011) should be treated with caution.

Table 11 - Fruit grown in the open and in glasshouses, 1982-2016

(a) Strawberries and Raspberries grown under cover first identified in 2011

(b) Changes between 2010 and 2012 (owing to both the changes to the SAF in 2012 and the Census form in 2011) should be treated with caution.

Table 12 - Bulbs, flowers and nursery stock grown in the open, 1982 - 2016

hectares

Year	Bulbs/flowers for dry bulbs and/or cut flowers in the open (a)	Bedding and pot plants grown in the open (b)	Hardy nursery stock					Total
			Fruit stocks	Roses and rose stocks	Shrubs (c)	Ornamental trees	Other nursery stock

2016	668.5	6.9	36.2	1.9	40.9	123.8	63.7	266.5

(a) Bulbs grown for dry bulbs and/or cut flowers in the open and other flowers for cutting in the open, not from bulbs no longer collected separately in 2009.

(b) Bedding and pot plants grown in the open first collected separately in 1998.

(c) Shrubs first collected separately in 1998.

(d) From 2009, step change using SAF data - see Note 5 in the "notes on content" for more details.

Table 13 - Cattle figures from Cattle Tracing Scheme 2006-2016 (see Note)

number

Year	Cattle Figures from Cattle Tracing Scheme											Total Cattle
	Female Dairy Cattle			Female Beef Cattle			Male Cattle		Calves			
	Female Dairy Cattle aged 1-2	Female Dairy Cattle 2 years and over - with offspring	Female Dairy Cattle 2 years and over - without offspring	Female Beef Cattle aged 1-2	Female Beef Cattle 2 years and over - with offspring	Female Beef Cattle 2 years and over - without offspring	Male Cattle aged 1-2	Male Cattle aged 2 and over	Female Dairy Cattle under 1	Female Beef Cattle under 1	Male Cattle under 1	
2006	48,500	182,654	57,449	224,455	495,016	88,687	233,521	78,388	48,133	255,647	286,526	1,998,976

Note: Statistical data on cattle populations have historically been collected through the June census and December survey in Scotland. CTS data have been used to obtain cattle figures for England and Wales since 2007. In order to reduce the burden on survey respondents, data from the June 2013 census (and in subsequent June and December data collections) has been obtained through the Cattle Tracing System (CTS), an administrative data source held by the British Cattle Movement Service (BCMS) which records cattle movements across Great Britain. Please see Notes of Content page for a fuller explanation
Cattle data from 1982 to 2012 collected using the June census are available on tables 14 to 19

Table 14 - Beef cattle, 1982 - 2012 (see Note) (continued in table 14)

Year	Cows and heifers in milk	Cows in calf but not in milk	Total beef cows	Heifers in calf

(a) Excluding cattle under 1 year old and bulls for service. See also tables 17-18.

(b) Consists of male cattle one year old and over, plus female cattle not for breeding one year old and over.

Note: Statistical data on cattle populations have historically been collected through the June census and December survey in Scotland. CTS data have been used to obtain cattle figures for England and Wales since 2007. In order to reduce the burden on survey respondents, data from the June 2013 census (and in subsequent June and December data collections) has been obtained through the Cattle Tracing System (CTS), an administrative data source held by the British Cattle Movement Service (BCMS) which records cattle movements across Great Britain. Data collected via the June census is provided up to 2012 for information. For the latest cattle figures collected using CTS, including data from 2006 to 2015, please refer to Table 13 and for explanation go to Notes on Content page

Table 16 - Dairy cattle, 1982 - 2012 (see Note)

Year	Cows and heifers in milk	Cows in calf but not in milk	Total dairy cows	Heifers in calf			Other heifers for breeding			Total dairy cattle (a)

Note: Statistical data on cattle populations have historically been collected through the June census and December survey in Scotland. CTS data have been used to obtain cattle figures for England and Wales since 2007. In order to reduce the burden on survey respondents, data from the June 2013 census (and in subsequent June and December data collections) has been obtained through the Cattle Tracing System (CTS), an administrative data source held by the British Cattle Movement Service (BCMS) which records cattle movements across Great Britain. Data collected via the June census is provided up to 2012 for information. For the latest cattle figures collected using CTS, including data from 2006 to 2015, please refer to Table 13 and for explanation go to Notes on Content page

Table 19 - Calves and store cattle bought/sold, 1982 - 2012

number

Year	Calves 2 years old and over		Calves 1 year old and under 2		Calves 6 months old and under 1 year		Calves under 6 months

(a) Horses for agricultural purposes and all other horses first collected in 1983.

(b) Farmed deer first collected in 1987.

(c) Donkeys first collected in 2015.

(d) Questions on camelids numbers were introduced in 2010. Revisions have been made to camelids figures for 2010-13. Figures have been estimated to account for holdings who have never returned data on camelids.

(e) Hives containing a colony of live honey bees, whether owned by farmer or not. The question on beehives was introduced in 2014.

Table 22 - Pigs, 1982 - 2016

number
