

2018 Scottish Cancer Patient Experience Survey goes live in September 2018!

If **you** receive a letter asking you to complete this survey – please fill it in. We are keen to hear **your experiences** of **your local cancer services**. **Your** opinion is important to us.

The survey will ask **over 8,000 people across Scotland** about their experiences of cancer care...

... from thinking that something might be wrong and receiving a diagnosis...

... through treatment and care...

... to the support they received after treatment.

National results will be published in Spring 2019. Survey results at NHS Board, Regional Cancer Network and Cancer Centre levels will also be made available via an interactive dashboard.

These results will help to **inform local services** about peoples' experiences of cancer care. They will also **highlight areas of best practice and areas for improvement** across Scotland.
