- **49%** of fuel poor households are Other, **36%** are Older, and **15%** are Families.
- **15%** of fuel poor and **11%** of extreme fuel poor households are Families.

- **44%** of fuel poor households live in houses.
- **56%** of fuel poor households live in houses.
- **41%** of fuel poor households are in the social sector.

**Energy Perceptions**

- **19%** of households reported keeping warm enough in winter either "Sometimes" or "Never", a **seven point reduction since 2013**.

- **28 percent** of households report owning an energy monitoring device - a **9 percentage point increase compared to 2017**.

- **5%** of households reported they can't afford to heat their home.

- Fuel poor and extreme fuel poor households are more likely to have difficulties staying warm in winter and to report affordability problems.
### Energy Efficiency

#### Wall Insulation
The proportion of cavity wall dwellings with wall insulation has increased by **7 percentage points** since **2012**.

![Wall Insulation Graph]

#### Loft Insulation
Lofts insulated to **at least 100 mm** have increased by **12 percentage points** since **2010**.

#### Carbon Emissions
Average modelled CO2 emissions were **73 kg/m²** in 2018, **down** from **80 kg/m²** in **2014**.

2014: CO2 80 kg/m²  
2018: CO2 73 kg/m²

#### Housing Quality
Improvement of **3 percentage points** since **2012** for no damp or condensation present.

2012: 86%  
2018: 89%
