

## Sexual Health and Blood Borne Virus Action Plan – Project funding

In order to deliver on some of the actions within the Sexual Health and BBV Action plan and continue the excellent work of services in Scotland, £800,000 of funding was allocated to projects including Health Boards, academia and the third sector. The projects are funded over a three-year period from 2023-2026 with some projects running for shorter periods. 60 were received and this therefore far outstripped the resource available. Twenty-two bids were taken forward based on priorities of the Action Plan, geographic spread and collaborative approaches and value for money.

The table of successful bids can be found on the following page

<b>Organisation</b>	<b>Project Name</b>	<b>Strategic Foci Addressed</b>	<b>Total Amount</b>	<b>2023/24</b>	<b>2024/25</b>	<b>2025/26</b>
