

## NHS Scotland 2018-19 Consolidated Financial Reporting to 30 November 2018 (Month 8)

### Purpose

This paper summarises the financial position for NHS Scotland for the reporting year 2018-19. It builds on the information already published since May 2018, and sets out the updated position at month 8.

The information contained in this report is a consolidation of the financial position as reported by all 22 NHS Boards. All NHS Boards report regularly and publicly on local financial performance and this information is available through individual NHS Board websites.

### Consolidated Financial Position

Based on the first eight months of the year (April-November 2018), a balanced year end position is forecast for the Health and Sport portfolio for both resource and capital budgets.

At month 8, NHS Boards are reporting a year-to-date adverse variance of £84.0 million and are forecasting a consolidated year-end adverse variance against budget of £96.2 million (6.6% decrease from month 7). The projected variance is expected to continue to reduce over the remainder of the year as further savings are delivered. In-year pressures highlighted by NHS Boards at month 8 include pay and drugs costs, which represent the most significant proportion of Boards' budgets.

At month 8, there are four NHS Boards which are anticipating a requirement for financial support in the form of brokerage in 2018-19. The indicative level of brokerage required is estimated at £67.7 million across the following Boards: NHS Tayside (£18.7 million); NHS Ayrshire and Arran (£20.0 million); NHS Highland (£19.0 million); and NHS Borders (£10.0 million). This compares with the actual total level of brokerage required in 2017-18 of £50.7 million.

The indicative level of brokerage for 2018-19 is within the planning assumptions of the portfolio, and is not therefore expected to create a risk to delivering a balanced overall portfolio outturn position. This overall portfolio forecast requires that all other Boards will deliver a balanced financial position, and therefore there is expected to be a reduction in the adverse forecast over the course of the remaining 4 months of the year.

Table 1 below summarises the financial position at 30 November 2018, with further analysis by NHS Board at Table 2.
