## SECTION A - INTRODUCTION

### 1 Introduction

- 1.1 The Scottish Ministers seek to establish a national single supplier framework for Desktop Client Devices.
- 1.2 The key aims of the Framework Agreement are to:
  - Deliver a range of best in class, future-proofed devices on a firm price, call-off basis ensuring value for money throughout the term of the Framework Agreement;
  - Include flexibility to introduce new technology through a process of continuous improvement during the term of the Framework Agreement;
  - Increase the uptake of eProcurement and expand eProcurement capability, through the adoption of cXML ordering and invoicing, resulting in increased transactional efficiencies for buyer and supplier;
  - Maintain a standard of Cyber Resilience including accreditation to Cyber Essentials Plus or equivalent standards within six months of award;
  - Provide the same level of service to all Framework Public Bodies, regardless of their size or geographical location.
- 1.3 The Framework Agreement supports the Scottish Government's [National Performance Framework](#), and the [National Outcomes](#) which articulate the Government's Purpose 'To focus Government and public services on creating a more successful country, with opportunities for all of Scotland to flourish, through increasing sustainable economic growth'.
- 1.4 The Contractor will be required to minimise the environmental impacts of products and services delivered where practical, contribute to a more circular economy, provide relevant opportunities for community benefits, and provide assurance regarding respect for labour rights and working conditions in the supply-chain.
- 1.5 The Framework Agreement will form part of a wider portfolio of ICT Products Frameworks which are available to Framework Public Bodies, designed to support the Digital Public Services Strategy: [Realising Scotland's full potential in a digital world: a digital strategy for Scotland](#) and other associated strategies and policies such as the [High-Level Operating Framework and Hosting & Data Centre Strategy](#).
- 1.6 One of the drivers for [Realising Scotland's full potential in a digital world: a digital strategy for Scotland](#) is to ensure ICT is deployed in an energy-efficient manner which reduces the carbon footprint of Scottish public sector organisations. The [Green ICT Strategy](#) and [Climate Change Plan](#) support the Scottish Government's objective for [A Greener Scotland](#) and organisations will be encouraged to contribute to their own vision for a cost effective, sustainable and energy efficient ICT estate by purchasing through the National Frameworks.

1.7 The Contractor will be expected not only to meet the requirements established within this specification but also ensure delivery of a high quality service to the Framework Public Bodies using this agreement. The Contractor will be expected to demonstrate the application and implementation of industry best-practice within internal and customer-facing processes. They will be expected to fully participate in continuous improvement and other initiatives to ensure the long term success of the contractual relationship and that value received by Framework Public Bodies is significantly and demonstrably greater than could be achieved by sourcing these categories of device elsewhere.

1.8 In order to maximise use of the Framework Agreement, the Contractor will be required to support the Authority in promoting the Framework Agreement across the Scottish public sector, at no additional cost. The Contractor will be required to actively promote the benefits of the Framework Agreement including financial, environmental, resource and operational efficiencies. This activity will be managed by the Contractor's Account Manager in conjunction with the Authority.

1.8 The following device types are considered to be within the scope of the Framework:

**Desktop Client Devices**

- Corporate Desktop

1.9 The Contractor will be required to deliver the complete range of goods and services required. To reduce warranty and administration overheads for Framework Public Bodies, all devices must be supplied from a single manufacturer.

- 1.10 The Authority does not guarantee any level of expenditure or demand for goods and/or services under the Framework.

## **2 Accessories & Associated Services**

- 2.1 The Contractor will provide a range of accessories and associated and added value services to support the deployment and operation of devices available under the Framework Agreement.

- 2.3 The Contractor will be required to maintain a sufficient stock of accessories to ensure lead times are consistently achieved.
- 2.4 All services associated with the deployment of framework devices are considered in scope of this Framework Agreement. These include but are not limited to –
- Imaging
  - Asset Tagging
  - Installation to Desk
  - Bonded Storage

- 5.1 The Framework Agreement will be available to all Scottish public sector and third sector bodies, as defined in the OJEU Contract Notice and Framework Terms and Conditions.

- 5.2 Framework Public Bodies with contracts in place for the management of their client device estate may authorise a third-party service provider to act on their behalf in the procurement of devices via this Framework Agreement. Assets supplied under the Frameworks Agreement must remain the property of the Framework Public Body.

## **6 Dedicated Portal**

- 6.1 An implementation plan will be established jointly with the Contractor and the Authority to ensure that the provision of Goods via a dedicated portal tailored to meet Scottish Procurement's requirements commences no later than 31 March 2020.
- 6.2 Prior to 31 March 2020, the Contractor will be required to receive orders by email.
- 6.3 The Contractor will be required to accept and fulfil volume orders in accordance with the stated lead times.

## **7 e Commerce Mobilisation**

Contractors must guarantee a stable image hardware platform in accordance with the minimum technical specifications listed at Annex B.

- 10.3 Throughout the term of the Framework Agreement, as devices reach their end of life date, Contractors will be required to transition contracted devices to next generation technology or an equivalent device (whichever applies to the technology roadmap for that device) **at no additional cost**.
- 10.4 Once devices are resident on the framework, if the manufacturer changes any aspect of the product range, the Authority reserves the right to transition to the latest device with no changes to the costing methodology.

## **11 Complementary Form Factors**

- 11.1 Throughout the term of the Framework Agreement, where additional technologies or new form factors are introduced, which are specific to the Framework Agreement, the Authority reserves the right to include these in addition to the core offerings. The Contractor will be required to demonstrate that these additional devices represent value for money in the marketplace.
- 11.2 Where a Framework Public Body cannot identify a device which meets their requirements from the menu of core devices, the Contractor will be expected to work with Framework Public Bodies, on a project specific basis, to identify an alternative device which meets their business need.

## **12 Evaluation Loan Pool**

- 12.1 To allow Framework Public Bodies to fully evaluate that devices are 'fit for purpose' in meeting their specific requirements, the Contractor will provide evaluation devices on a free of charge, trial basis. The duration of the evaluation process will be agreed between Framework Public Bodies and the Contractor.
- 12.2 The Contractor will facilitate the evaluation process including delivery and collection of evaluation devices, ensuring that the administration overhead placed on Framework Public Bodies is kept to a minimum. Contractors will be required to maintain sufficient stock of evaluation devices within their loan pool to ensure devices are made available to a number of Framework Public Bodies concurrently.
- 12.3 Immediately following approval by Scottish Procurement, the Contractor must ensure availability of devices for individual organisations and/or sectors, to allow them sufficient time to facilitate the introduction of the new devices into their corporate environment. The evaluation loan pool should be sufficiently stocked to facilitate a number of concurrent requests

### **13 Alternative Solutions**

13.1 Where the Contractor has an alternative component manufacturers chipset and motherboard solution available in their product portfolio during the term of the Framework Agreement, the Scottish Ministers reserve the right to offer these as an alternative. The Contractor must demonstrate that any such alternative devices meet the performance requirements of the core devices and offer Framework Public Bodies significantly improved value for money.

### **14 Supplier Catalogue**

14.1 The Contractor will be required to assist Scottish Procurement to support and achieve the benefits of the Framework Agreement through the education of decision makers and users, on how cost can be reduced for Framework Public Bodies.

14.2 This will include the production of a Supplier Catalogue which as a minimum must include:

- Standard Goods and Services available
- Technical Specifications
- Upgrades & Accessories
- Part Numbers
- Pricing
- How to Order
- How Product Information can be Accessed
- eProcurement
- Warranty Information
- Account Management Details
- Escalation Processes
- Guidance on Receipt of Goods
- End-of-life management.

### **15 e Commerce**

15.1 The effective use of technology is at the heart of procurement reform and Scottish Procurement is leading a number of core initiatives to ensure that public procurement delivers value for money and contributes to the Scottish economy.

15.2 The Scottish Government's eCommerce Shared Service brings together all the steps involved in doing business with the public sector in Scotland. It is a collaborative electronic environment, that promotes improved capability across public procurement in Scotland. As well as enabling business to be conducted more simply, consistently and effectively, it plays a key strategic role in delivering and sustaining procurement benefits and best practices. The use of technology presents greater opportunities for procurement managers to influence business by streamlining and standardising procurement process, delivering more effective contracts, monitoring procurement activity and collaborating more effectively.

- 15.3 The eCommerce Shared Service delivers Purchase-to-Pay (P2P) capability through the following systems:
- PECOS P2P system provides a consistent interface to suppliers through standard order, receipt and invoice functionality. It enables business workflows and audited approval processes to be implemented to ensure compliance to procurement and finance guidelines.
  - PECOS Content Manager (PCM) hub hosts electronic catalogues for contracts at national, sectoral and local level. It increases compliance to contracts, drives out appropriate contract management information and embeds standard procedures and processes. The hub allows suppliers and procurement teams to easily manage the upload, validation, approval and publication of electronic catalogues for use by public sector bodies. The hub also enables the distribution of catalogues in a variety of formats, e.g PECOS, Civica, Parabilis and SciQuest to allow the upload of catalogues into different P2P systems. PCM is currently being used by the procurement Centres of Expertise and a number of individual Contracting Authorities.
  - eInvoicing is an electronic service that facilitates the exchange of information between buyers and suppliers. It allows invoices and related documents to be issued, received and reconciled electronically through a secure channel.
  - Each of the systems are available to all Scottish Public Sector Authorities.
- 15.4 PECOS P2P has been deployed to approximately 92 Scottish public sector Contracting Authorities including local authorities, central government, NHS, universities and colleges.
- 15.5 PECOS P2P and PCM provide a number of key benefits to Contractors:
- standard and consistent interfaces to the public sector in the presentation of catalogues, the receipt of purchase orders and payment mechanisms (including eInvoicing and Purchase Cards);
  - where P-Cards are utilised, suppliers can receive payment in as little as 3 days from when the goods are dispatched from warehouse;
  - where catalogues are used, the supplier only needs to amend content once and it then flows to all Contract Authorities using that catalogue;
  - receipt of accurate and standard purchase orders which should reduce the number of invoice mismatches; and
  - development of eCommerce capabilities to support further business opportunities.
- 15.6 Supplier eEnablement is the process of enabling suppliers to conduct business electronically through the eCommerce Shared Service. A clear and consistent approach is used by the Service in the e-enablement of suppliers to remove duplication of effort and mixed messages.

15.7 There are a number of different options available to suppliers in the provision of content, transmission of orders and payment of goods/services.

15.8 Content Options:

- eCatalogue - simple to create, using a standard excel template to detail products, pricing, UNSPSC (commodity) coding, images etc.;
- Punch-Out - where a transactional website has already been developed by the supplier, PECOS P2P shall connect to this website allowing users to create a shopping basket and bring back the details to complete the requisition within PECOS P2P;
- Non-Catalogue - allows requisitioners to enter free-text requisitions where none of the above content options are available.

15.9 Purchase Order Transmission Options:

- Post – a paper purchase order is produced by PECOS P2P and posted to the supplier.
- Fax - PECOS P2P creates an electronic fax purchase order that is sent automatically to the supplier.
- E-mail - PECOS P2P produces a PDF purchase order that is automatically sent to the supplier's email inbox.
- cXML - PECOS P2P sends a cXML file directly to the supplier's back office system (please note that there is a one-off charge for this method but allows multiple Contracting Authorities to use the connection).

Preferred option of transmission should be aligned with supplier capability and which option will be most efficient to support business needs.

15.10 Payment Options:

- Paper Invoice - Supplier submits a paper invoice to the organisation as standard for each purchase order received.
- Embedded Purchase Card - This payment option allows the supplier to charge the cost of the goods/services provided to a VISA/MasterCard electronic Purchasing Card (ePC) belonging to a Contracting Authority. The supplier shall receive payment from VISA/MasterCard therefore negating the need to provide an invoice to the Contracting Authority.
- Consolidated Electronic Invoice - Supplier submits a single invoice covering multiple purchase orders in an electronic file.
- Self-Billing - Once the Goods Received Note (GRN) has been entered on PECOS P2P, a payment instruction is automatically sent to the Contracting Authority's finance system to make payment to the supplier for the goods/services received.

- Electronic Invoices - Supplier submits an electronic invoice either directly to PECOS P2P/relevant system (cXML) and/or via the SG eInvoicing Solution, which can go again direct to PECOS P2P or a Contracting Authority's finance system.

- 15.11 The Contractor when providing catalogue data or punch-out solution is required to maintain price and product data in accordance with that agreed in the Framework, including any updates.
- 15.12 The Contractor is required to work with the Authority and the Framework Public Bodies in the promotion of process efficiencies.
- 15.13 Due to the nature of this collaborative procurement, Framework Public Bodies are at different stages of automation. Accordingly, the Contractor must be able to provide 'traditional' forms of communication, such as, orders via telephone and facsimile, paper timesheets and invoices.
- 15.14 Scottish Ministers (through the eCommerce Shared Service) have introduced and are aspiring to reach a level of 100% eInvoicing. The Contractor will work with the Authority and Framework Public Bodies in the implementation and rollout of eInvoicing during the lifetime of the Framework Agreement.

## **16 Bespoke Website**

- 16.1 The Contractor will be required to create bespoke web pages for this Framework Agreement on a secure section of their company's web server. A secure online ordering portal and punch-out site will be required.
- 16.2 Website content will be subject to clarification upon framework award, but typically will include a dedicated Scottish Procurement National Framework Agreement landing page providing secure access to catalogue, associated documents, product details, framework pricing, stock levels, company information, contact details and any other information as may be required.
- 16.3 The Contractor will be required to make the Framework Terms and Conditions available on their website and include functionality which allows end users, as part of the ordering process, to state they have read and accepted the Terms and Conditions which are applicable to all orders placed under the framework.
- 16.4 Scottish Procurement have a number of other formally tendered national Framework Agreements currently in place. These frameworks are available to all Scottish public sector bodies. The Contractor will NOT promote Goods other than those within the scope of this framework on the punch-out site or portal web pages dedicated to the National Desktop Client Device Framework, unless successful in being awarded a separate client device framework.
- 16.5 Framework Public Bodies may also require their own dedicated web pages containing a tailored list of Goods available to their users. This will be subject to negotiation between the Contractor and individual Framework Public Bodies and should be completed within 4 weeks of a request.

## **17 Packaging**

- 17.1 The Contractor will be required to support a reduction in packaging under this Framework Agreement. This must not hinder the safe delivery of products.
- 17.2 This reduction must be supported by the Contractor applying the waste hierarchy in packaging use, while reducing environmental impacts through:
- Sustainably sourced materials;
  - A minimum of 50% recycled content;
  - Re-usable packaging systems, such as unboxed palletised packaging or others;
  - Recyclable materials, including the avoidance of single-use plastics;
  - Creative packaging design and innovative materials;
  - Compliance with all relevant EU and other packaging and waste regulations;
  - Plastics use not containing halogen containing polymers.
- 17.3 Packaging must not contain any plant based material that was illegally sourced from its country of origin. The Contractor will be expected to be able to verify legal sourcing of relevant materials.
- 17.4 Items are to be packed by order, with individual orders packed and labelled separately. The Contractor will be responsible for ensuring that all packaging is of adequate size and of substantial quality to prevent damage to the goods and with regard to the environment. Each delivery must be accompanied by a delivery note, in a protective sleeve, containing the following information as a minimum:
- Contact;
  - Delivery Address;
  - Purchase Order Number;
  - Product Code and Description;
  - Product Quantity and details of goods/quantity to follow;
  - Serial Number (where available)
  - MAC Address (where available)
  - Quantity of parcels made up for each order.
- 17.5 The Contractor will be responsible for the removal of packaging where an additional service element is required e.g., installation or if arranged prior to delivery by the Framework Public Body.

## **18 Lead Times**

- 18.1 From receipt of a valid Purchase Order, maximum lead times for standard core devices will be 10 working days. Non-standard configurations and additional services will each incur an additional 5 working day lead time, taking the maximum to 20 working days.
- 18.2 In remote and island locations, a lead time which includes an extra 2 working days will be acceptable but Contractors should aim to achieve the standard lead time where possible.

## **19 Delivery**

- 19.1 A full delivery service must be provided, which includes but is not limited to the following:
- Bulk delivery to stores – one bulk delivery to one central point, i.e. stores.
  - Single location with multiple drops – one bulk delivery split across multiple locations within the same site, i.e. a school or hospital.
  - Multiple locations – one order with multiple site locations spread across a geographical area, i.e. a Local Authority.
  - Call off – one bulk order to be held, in bonded storage, and called-off by the Framework Public Body as and when required.
- 19.2 No deliveries are to take place outside the hours of 0900 to 1700 unless otherwise agreed. Black-out periods e.g. during lunch breaks may be imposed on deliveries to schools and other similar locations; the individual Framework Public Body would be expected to advise the Contractor of any specific requirements. When making deliveries to schools, personnel must report first to the school office and delivery vehicles may be driven through school playgrounds only on the approval and direction of an authorised person.
- 19.3 A signature will be required for each delivery made. Under no circumstances should goods be left outside the building.
- 19.4 In the event of a query, the Contractor will be required to provide proof of delivery, electronically if required, to the Framework Public Body.
- 19.5 No mechanical off-loading, lifting or moving equipment is supplied by the Framework Public Body. No assistance is available to the Contractor for the purpose of off-loading and placing goods within the delivery location.

## **20 Delivery Locations**

- 20.1 The Framework Agreement will be available to Framework Public Bodies across all areas of Scotland. The Contractor must provide Framework Public Bodies with the same level and quality of service, irrespective of their size or geographical location and will be required to undertake deliveries throughout the whole of Scotland.

## **21 Consolidation**

- 21.1 Unless expressly agreed by the Framework Public Body, deliveries should be consolidated, i.e. where a device and accessories have been ordered together on a single Purchase Order, all items should arrive at the requested delivery location in one consignment.

## **22 Returns & Collections**

- 22.1 Framework Public Bodies should notify the Contractor of Goods which are faulty, received in a damaged state or delivered in error, within 5 Working Days.
- 22.2 All faulty, damaged or incorrectly delivered items must be replaced or uplifted by the Contractor within 5 Working Days.
- 22.3 Framework Public Bodies should ensure the Goods are available for collection, unopened (if received in error) and in the same condition they were delivered.
- 22.4 The Contractor will be expected to monitor the level of returns and ensure compliance with the relevant key performance indicator.
- 22.5 Items ordered in error by a Framework Public Body may be returned at the sole discretion of the Contractor and may be subject to a restocking fee, which will not exceed 10% of the unit cost including the cost of collection.

## **23 Delivery Fleet**

- 23.1 The Contractor will be expected to maintain an efficient delivery fleet and minimise the environmental impact of deliveries, such as through efficient logistics, full loads and driver training. It is expected that the Contractor will continually monitor and report on the fleets' efficiency and work to reduce the environmental impact over the term of the Framework Agreement.

## **24 Invoicing Process**

- 24.1 The Contractor must offer and provide an Electronic Invoicing service.
- 24.2 The Contractor **must** also be capable of supplying consolidated invoices. Invoices must include Purchase Order number and line item detail of the items being invoiced.
- 24.3 Where electronic invoicing is not being used, the invoices will be sent to the email address specified. Where Framework Public Bodies cannot accept electronic invoices then hard copy invoices will be made available; these will be sent to an agreed address.
- 24.4 The Contractor shall promote the option of providing electronic and/or consolidated invoices where possible to the Framework Public Body.

## **25 Payment**

- 25.1 The Contractor will be expected to support Scottish Government good practice with regards to payment of Contractors and Sub-contractors. Where possible Framework Public Bodies will be encouraged to make prompt payment to Contractors, within 10 calendar days. There will be an expectation upon the Contractor to use this timescale to make payment to their supply base.

## **26 Warranty**

- 26.1 Warranty must cover parts and labour on a next business day, on-site basis, for 3 calendar years from the date of delivery to Framework Public Bodies. For the avoidance of doubt, the definition of next business day is considered to mean the next normal Working Day (excluding Scottish Public holidays) where the issue was raised before 16:30 the preceding day.
- 26.2 An enhanced, post-sales technical support facility will be made available to Framework Public Bodies, at no additional cost. This facility will provide nominated IT Personnel with priority telephone access to expert technical resources, who have been specifically trained to deal with problem diagnosis and resolution, quickly and efficiently, for in-warranty devices. The ability to access technical resources, log and track hardware calls must be available as part of this warranty service.
- 26.3 The provision of on-site warranty requires the device to be maintained by a qualified service engineer, on the Framework Public Body's site. The device should not leave the Framework Public Body's site unless it is considered to be 'Dead on Arrival' (DOA), at which point the procedure for dealing with DOA devices should be invoked.

## **27 Warranty Registration**

- 27.1 The Contractor must have a process in place to ensure the appropriate level of warranty has been registered, ensuring a seamless process for Framework Public Bodies logging a warranty call.

## **28 Dead on Arrival (DOA)**

- 28.1 Devices can be classed as Dead On Arrival (DOA) up to 30 days from receipt of the device by a Framework Public Body. For the avoidance of doubt, DOA means the device cannot be physically powered on or be ready for use after removing the device from the packaging.
- 28.2 In this instance DOA devices should be replaced. In the event that a replacement cannot be provided due to product constraint or supply chain difficulty, the Contractor should repair the product in line with the terms of the warranty arrangement for that particular device.
- 28.3 To ensure a minimal amount of disruption, the Contractor will be expected to prioritise the delivery of a replacement device to the Framework Public Body.
- 28.4 The Contractor will be required to provide this service across the geography of Scotland.

## **29 Security**

- 29.1 The Contractor will be required to undertake appropriate security and other checks, including Disclosure Scotland, necessary to ensure that their drivers, and travelling representatives, are suitably screened in order to undertake deliveries and other visits to sensitive locations such as schools, hospitals and government buildings. Details of Disclosure Scotland requirements can be found at: <https://www.mygov.scot/organisations/disclosure-scotland/>.
- 29.2 Framework Public Bodies may require different levels of security clearance. The Contractor must ensure they have a sufficient number of Baseline Personnel Security Standard (BPSS) security cleared qualified service engineers.

## **30 Information Security**

- 30.1 Due to the sensitive nature of public sector data, there will be Framework Public Bodies whose IT policy dictates that, in the event of a fault, removable media should not be removed from the premises. The Contractor will have a procedure in place for the secure disposal/transport of removable media e.g. the provision of a 'defective media retention' service at minimal cost to the Framework Public Body.
- 30.2 The Contractor must ensure that they are aligned to the principles of the Cyber Essential Plus scheme and fully compliant within 6 months of the Framework Commencement Date.
- 30.3 Where the Contractor processes Personal Data as a Data Processor on behalf of a Framework Public Body, the Contractor must enter into a data processing agreement in the form set out in Schedule 9 (Model Contract regarding Data Protection Directive 95/46/EC).

## **31 Framework Management**

- 31.1 The Contractor will nominate a dedicated Framework Manager to act as a single point of contact for the purposes of managing and operating the framework. The Framework Manager will ensure the agreed service levels are maintained and will work on an on-going basis with their Account Management Team to ensure that a high level of service is consistently delivered, best value is assured throughout the term of the framework and that opportunities to develop best practice are maximised.

## **32 Framework Review Meetings**

- 32.1 The Framework Manager and/or members of the Account Management Team will attend regular review meetings with Scottish Procurement and/or Framework Public Bodies as required.
- 32.2 If required, the Account Management Team must be available to participate in regular conference calls with the Authority. The purpose of these conference calls will be to discuss day-to-day operation of the Frameworks and any associated issues.

**33 Account Management Team**

33.1 The Contractor will provide an Account Manager for each Framework Public Body, to pro-actively co-ordinate orders and provide comprehensive support and links between the Contractor and the Framework Public Body. The support must include pre, during and after sales support, technical information and advice on all devices.

**34 Order Fulfilment**

34.1 An order fulfilment service level of 97% delivered within the agreed lead times will be required for all Goods ordered under this Framework Agreement. The Account Management Team should contact Framework Public Bodies to advise them where any requirements may exceed the stated lead times before accepting the order.

**35 Order Acknowledgement**

35.1 An automated order acknowledgement must be provided within 24 hours of an order being received. A weekly automated report must be issued to Framework Public Bodies providing information on orders placed, including Framework Public Body's Order Number, item and quantity ordered and status (shipped or confirmed delivery date).

**36 Performance and Reporting**

36.1 Key Performance Indicators (KPIs) will be utilised to monitor the performance of the frameworks on a quarterly basis. The Contractor will be required to report against these KPIs in line with the Management Information requirements.

36.2 The table below provides proposed Key Performance Indicators (KPIs) and expected performance targets which will be agreed by both Parties on award of the Framework Agreement:

## **37 Management Information**

- 37.1 The Contractor will be required to produce management information, including transactional data, in relation to the overall performance of the framework. This information will be provided to Scottish Procurement every 3 months, 10 Working Days after the previous quarter end. The reports will provide a sufficient level of detailed, accurate information, so as to enable Scottish Procurement to understand how each Framework Public Body is procuring devices under the Framework Agreement. The information and level of detail will be agreed between Scottish Procurement and the Contractor. The information will also be made available to the individual Framework Public Body as required.
- 37.2 Data and/or information to support the answering of freedom of information (FOISA) requests, First Minister Questions (FMQs), Parliamentary Questions (PQs) and Ministerial Correspondence Submissions (MCS) will be provided within 5 Working Days, as and when required by Scottish Procurement or the Framework Public Body.
- 37.3 The Contractor will be required to hold and to be able to make readily available to Scottish Procurement and Framework Public Bodies, a minimum of 24 months of historical data. Records must be retained and maintained for 5 years as per the Framework Terms and Conditions.
- 37.4 All information should be provided electronically and be available in MS Excel format.
- 37.5 Any additional management information requested by the Authority will be provided at no additional cost.

## **38 Escalation**

- 38.1 First line management of operational issues will be undertaken between the Framework Public Body and their Account Manager. A clear issue management and escalation process will be established by the Contractor in consultation with Scottish Procurement. This will include the provision of a dedicated escalations mailbox where complaints and issues raised by Framework Public Bodies will be recorded, together with an audit trail of the time taken for the Contractor response. An 'issue' is defined as a failure to meet the requirements outlined in this Statement of Requirements. A 'complaint' is defined as a formal escalation in writing to the Contractor.
- 38.2 The Contractor will acknowledge all complaints within 2 working Days and advise the Authority of all complaints received within 24 hours of receipt. The Contractor will within 2 Working Days of receipt of a complaint, provide a full response or action plan detailing how the complaint will be resolved and the expected resolution date.
- 38.3 If a complaint is not resolved within the stated timescales the Contractor will update the Authority on progress on a daily basis.

## **39 Communications**

- 39.1 Scottish Procurement will be the primary route for the communication of changes to the Framework Agreement. The Contractor will, however, be expected to maintain regular dialogue with Framework Public Bodies. Scottish Procurement must authorise any publication relating to the framework, prior to distribution.
- 39.2 The Authority will publish and distribute to Framework Public Bodies via Scottish Procurement's secure website, relevant information relating to the framework.

## **40 Environmental Policy/Products**

- 40.1 The Contractor will increase the sourcing of components that reduce adverse effects on the environment, whilst ensuring no degradation to the product quality. The Contractor will adhere to, and fulfil all obligations relevant under the WEEE Directive and Restriction of Hazardous Substances (RoHS) guidelines, for the duration of the Framework Agreement, ensuring that all waste and end-of-life equipment and/or components which cannot be re-used is recycled avoiding waste to landfill.
- 40.2 The Contractor will assist Framework Public Bodies, where relevant, to deliver circular economy outcomes through appropriate measures to extend devices' useful life, through appropriate measures such as product design, take back of products aligning with Framework Public Bodies replacement cycles, reuse of devices or parts or re-conditioning and potentially re-deployment of devices.

## **41 Security of Supply**

- 41.1 The Contractor will maintain security of supply through appropriate and robust management of supply chain risks, which are reasonably within their control, and which may arise due to availability of components, environmental, social or other relevant factors.

## **42 Conflict Minerals**

- 42.1 It is recognised that there are concerns regarding the use of 'conflict minerals' within electronics products, which are mined in conditions of armed conflict and human rights abuses, and which are sold or traded by armed groups. The US introduced the Dodd-Frank Wall Street Reform and Consumer Protection Act 2010 which focuses on certain minerals arising from the Democratic Republic of Congo (DRC) and applies only to US listed companies. In 2017 the EU adopted the conflict minerals regulations (<http://ec.europa.eu/trade/policy/in-focus/conflict-minerals-regulation/legal-texts-and-documents/>) which obliges EU companies to source their imports of tin, tantalum, tungsten and gold responsibly and to ensure that their supply chains do not contribute to funding armed conflict. These 'due diligence' rules will become binding from 1 January 2021, though importers are encouraged to apply them as soon as possible

- 42.2 Throughout the term of the Framework Agreement, the Contractor will be required to demonstrate how they assess the likelihood of conflict minerals within products, and what measures they have undertaken to minimise and eliminate, where practical, such minerals. The Contractor will be required to comply with any existing, new and emerging legislation and/or self-certification system.

### **43 Environmental Standards**

- 43.1 The Contractor will be required to maintain a standard of environmental protection, including, certification to ISO 14001/EMAS or equivalent standards, relevant to the delivery of this Framework Agreement. They will also be expected to support carbon reporting to assist Framework Public Bodies in meeting their environmental targets. All products should meet or exceed the minimum environmental standards detailed in the minimum specification for each device.

### **44 Energy Efficiency**

- 44.1 All products should meet or exceed the minimum energy efficiency standards detailed in the minimum specification for each device.

### **45 Social & Ethical Responsibility**

- 45.1 The Authority has included obligations within the contract conditions relating to ethical working conditions and labour standards, which are relevant to the products/services to be delivered. These obligations reflect Scotland's commitment to economic, social and human rights as reflected in the International Labour Organisation ([ILO](#)) core conventions, the International Covenant on Economic, Social and Cultural Rights ([ICESR](#)), Scotland's National Action Plan for Human Rights ([SNAP](#)), the UN Sustainable Development Goals ([SDGs](#)) and the [Human Trafficking and Exploitation \(Scotland\) Act 2015](#).

- 2 Direct Buying Route ..... 3**
- 3 Framework Mobilisation ..... 3**
- 4 Ordering Procedures ..... 4**
- 5 eCommerce ..... 4**
- 6 Purchase Order Information ..... 5**

## **1 Ordering Procedure**

1.1 Where a Framework Public Body decides to source Goods through this Framework Agreement then it shall be entitled at any time during the Period to place an order for Goods by submitting a Purchase Order and/or Purchase Order Information to the Contractor in accordance with the procedures described in this Schedule 3 (Ordering Procedure) and therequirements and guidance defined in the BuyersGuide (see section 3.1 below).

## **2 Direct Buying Route**

2.1 Where a Framework Public Body is able to determine the part number details and price for their requirement from the Buyers Guide, Contractor's portal or eCommerce catalogue, the Contracting Authority will simply place an order with the Contractor as per the instructions outlined in the Ordering Procedures, providing the required Purchase Order Information (see section 7) and in accordance with Schedule 5 (Call Off Terms & Conditions).

2.2 Where a Framework Public Body is unable to determine the information required to place an order the Framework Public Body shall be provided with a named Account Manager who will provide support including pre, during and after sales support, technical information and advice on all devices.

2.3 In the event that a Framework Public Body makes an approach to the Contractor with a request for the supply of products and services which are the same as or similar to the Goods available on this Framework Agreement, the Contractor shall promptly and in any event within five (5) Working Days of the request by the Contracting Authority and before the supply of the equivalent products or services, inform such Contracting Authority of the existence of this Framework Agreement and its ability to place orders for the Goods pursuant to it.

## **3 Framework Mobilisation**

3.1 Immediately following confirmation of award, framework implementation meetings will take place between the Authority and the Contractor. During these meetings the Contractor will be expected to support and develop the content of a Buyer's Guide. The Contractor will also be expected to support the ratification of the pricing and provision of quotation methodology.

3.2 The Contractor will also work with individual Framework Public Bodies to ensure a smooth transition to their preferred eProcurement route; either cXML (both order and invoice), dedicated portal or punch-out implementation.

3.3 The Buyer's Guide will include (but not be restricted to):

- Details of the Contractor's organisation;
- Details of the Ordering process and links to Contractor sites as appropriate;
- Account Management details;
- Customer service and support processes;
- Escalation process; and
- Best Value initiatives.

3.4 The output of 3.1, 3.2 and 3.3 must be fully implemented within six weeks of confirmation of award and at no additional cost to the Authority or Framework Public Body. The Contractor will ensure that the Account Manager or equivalent senior representative attends all Implementation Meetings. The Contractor's representative must be empowered to make decisions on behalf of the Contractor's organisation.

#### 4 Ordering Procedures

4.1 The Contractor must have an appropriate structure and process in place to manage new orders and change requests from Framework Public Bodies.

4.2 The Contractor will be able to accept order forms in electronic, paper formats or any other format as agreed between the Authority, Framework Public Bodies and Contractor.

4.3 The Framework Public Body will be required to provide an Order that refers to the Framework Agreement and details the Framework Public Body's reference number. The Contractor will include the Framework Public Body's reference number on all correspondence.

4.4 An automated order acknowledgement must be provided by the Contractor within 24 hours of an order being received from a Framework Public Body. A weekly automated report must be issued to the Framework Public Body providing information on orders placed, including the Framework Public Body's order number, item and quantity ordered and status (shipped or confirmed delivery date).

4.5 Core devices will be delivered within 10 working days and all other non-standard configurations and additional services will incur an additional 5 working days, taking the maximum to 20 working days.

4.6 The Contractor will work with the Framework Public Body to reduce the number and/or frequency of orders being placed and in turn reduce the cost of delivery over the duration of the Framework Agreement.

#### 5 e Commerce

5.1 The effective use of technology is at the heart of procurement reform and the Authority is leading a number of core initiatives to ensure that public procurement delivers value for money and contributes to the Scottish economy.

5.2 The Contractor shall create bespoke web pages for this Framework Agreement on a secure section of their company's web server. A secure online portal and punch-out site is a minimum requirement for ordering Web Based and Proprietary devices.

5.3 The Contractor will be able to make use of and support a range of eCommerce technologies, including but not limited to:

- **Content Management** - Pecos Content Management (PCM) facilitates the upload, approval, distribution and on-going management of electronic content to support both collaborative contract arrangements and local contracts (where appropriate). The system ensures that content is provided to end users from the Contractors in the most efficient manner possible, with the correct pricing & product descriptions displayed. The main advantage to Contractors is that they are able to manage and provide their content once in a standard format which is easily validated and

then published onto the purchase-to-pay systems of many public sector buying organisations. Contractors should be able to provide electronic catalogues (eCatalogues) to be used in PCM or to provide a “punch-out” capability to their own eCatalogues.

- **Ordering** - PECOS (Professional Electronic Commerce Online System) is the eOrdering system of choice for the Scottish public sector. It enables the generation and submission of orders using fax, e-mail, and industry standard electronic protocols including EDI and cXML.
- **Payment** - a number of finance systems are used across the Scottish public sector, and when interfaced with PECOS or through their own integrated e-Ordering systems provide Contracting Authorities with a full Purchase to Pay (P2P) solution. Many systems also include functionality to receive and match invoices electronically (i.e. eInvoicing), manage low-value/high-volume transactions through Purchasing Cards (e.g. Electronic Procurement Card), consolidate multiple purchase orders into a single invoice and even remove the need for an invoice through self-billing on receipt of an approved purchase order.

5.4 The Contractor will be expected to provide an overview of their eCommerce capability within the Buyers Guide, and facilitate the provision of quotations if the Framework Public Body is unable to determine the appropriate ordering information from the Contractor's web pages.

## 6 Purchase Order Information

6.1 The minimum information to be provided at the time of placing an order is:

- 6.1.1 Date of Purchase Order;
- 6.1.2 Name of person placing the Purchase Order;
- 6.1.3 Framework Public Body's Purchase Order Reference;
- 6.1.4 The Goods to be supplied including quantity;
- 6.1.5 Reference to the Framework Agreement and acceptance of the Call Off Terms and Conditions;
- 6.1.6 Time(s) and date(s) for the delivery of the Goods (taking into account the minimum periods of delivery);
- 6.1.7 Premises to which the Goods are to be delivered including points (and whether special delivery requirements are required);
- 6.1.8 Arrangement for invoicing; and
- 6.1.9 Procurement Card number (if number (if applicable)).

This and the following 3 pages comprise Schedule 4 to the Framework Agreement between the Scottish Ministers and HP Inc. UK Limited

- 3.3 The Contractor shall ensure the application of security patches to vulnerabilities in a timely and prioritised manner.
- 3.4 The Contractor shall:
  - 3.4.1 implement a mechanism for receiving, analysing and acting upon threat information supplied by GovCertUK, or any other competent Government Body;
  - 3.4.2 ensure that its System is monitored to facilitate the detection of anomalous behaviour that would be indicative of system compromise;
  - 3.4.3 ensure it is knowledgeable about the latest trends in threat, vulnerability and exploitation that are relevant to the Contractor's System and the Services by actively monitoring the threat landscape during the Term;
  - 3.4.5 pro-actively scan its System (to the extent within the control of the Contractor) for vulnerable components and address discovered vulnerabilities through the processes described in the Security Plan as developed under paragraph 3.2.1;
  - 3.4.6 propose interim mitigation measures to vulnerabilities in its System known to be exploitable where a security patch is not immediately available;
  - 3.4.7 remove or disable any extraneous interfaces, services or capabilities that are not needed for the provision of the Services (in order to reduce the attack surface of the Authority's System and the Contractor's System); and
  - 3.4.8 inform the Authority when it becomes aware of any new threat, vulnerability or exploitation technique that has the potential to affect the security of the Services, the Authority's System and the Contractor's System and provide initial indications of possible mitigations.
