### Additional Case Information:

3 lines of stock currently held onsite, two lines of 2 year old stock and one line of 5 year old stock. The 2 year old stock appeared to be in good condition, little fouling observed on shells. The 5 year stock was heavily fouled with tube worm and other marine plant material. Very few open shells observed across the site.

Uig Seafares are unsure of their future plans for the site, this may be their last production cycle.

## Inspection under the Aquatic Animal Health (Scotland) Regulations 2009

The above site was inspected in accordance with the Aquatic Animal Health (Scotland) Regulations 2009.

All epidemiological units were inspected. On this occasion no samples were taken for disease analysis. The Inspector did not observe any clinical signs associated with the listed diseases as described in the Aquatic Animal Health (Scotland) Regulations 2009. <u>Records</u>

The surveillance frequency category of the site was assessed as low. An inspection under the Aquatic Animal Health (Scotland) Regulations 2009 will be conducted every fourth year. The category of the site will be reassessed on a routine basis and updated as required.

The information required for the public record of aquaculture production businesses regarding this site was verified and where necessary updated. The following records were also inspected to ensure that the conditions of authorisation for your Aquaculture Production Business (APB) are being met:

Aquaculture animal and aquaculture animal product movement records were inspected and found to be inadequately maintained.

No mortality had been observed on site since the last inspection by Marine Scotland.

The biosecurity measures plan for the site was not available for inspection.

The following points were raised with the site representative during the inspection:

- Site name and number not included in movement records. This issue was discussed during the inspection and a new aquaculture animal and product movement record book has been sent to the site by post which is to be used in replacement to the sites current electronic version of movement records. No further action required on this point.
- The site specific biosecurity measures plan was not available during the inspection. A template biosecurity measures plan was sent to the site contact. This needs to be adapted to be specific to Gob Sgrithir (SS0626) and returned to the Fish Health Inspectorate for evidence that these measures have been implemented.

These must be addressed to ensure the conditions of authorisation for your Aquaculture Production Business (APB) are being met. Records or documentation demonstrating that these

points have been addressed should be sent to the Fish Health Inspectorate (contact details below) within 30 days of the date this report was issued.

Please contact myself or the duty inspector should you require any assistance or clarification in implementing any requirement or recommendation detailed in this report.

Signed:

Date: 17/07/2023

Fish Health Inspector

The Fish Health Inspectorate Service Charter detailing standards of service is available on the Marine Scotland website at <a href="https://www.gov.scot/publications/fish-health-inspectorate-service-charter/">https://www.gov.scot/publications/fish-health-inspectorate-service-charter/</a>

### Warning letter issued

Issues were raised in relation to the above case, with a requirement for records unavailable for inspection to be submitted by 18/08/2023. The required records have not been provided to the Fish Health Inspectorate.

A warning letter was issued on 01/02/2024 requesting that the records are made available for inspection by 01/03/2024. Failure to comply with the warning letter may result in enforcement action being taken.

Please contact myself or the duty inspector should you require any further information or have any queries regarding this report.

Signed: Fish Health Inspector

Date: 01/02/2024

The Fish Health Inspectorate Service Charter detailing standards of service is available on the Scottish Government website at Fish Health Inspectorate Service Charter - gov.scot (www.gov.scot)

DATE OF VISIT17/05/2023SITE NAMEMol MorINSPECTORInspector

Inspection under the Aquatic Animal Health (Scotland) Regulations 2009

The above site was inspected in accordance with the Aquatic Animal Health (Scotland) Regulations 2009.

All epidemiological units were inspected. On this occasion no samples were taken for disease analysis. The Inspector did not observe any clinical signs associated with the listed diseases as described in the Aquatic Animal Health (Scotland) Regulations 2009. <u>Records</u>

The surveillance frequency category of the site was assessed as low. An inspection under the Aquatic Animal Health (Scotland) Regulations 2009 will be conducted every fourth year. The category of the site will be reassessed on a routine basis and updated as required.

The information required for the public record of aquaculture production businesses regarding this site was verified and where necessary updated. The following records were also inspected to ensure that the conditions of authorisation for your Aquaculture Production Business (APB) are being met:

Aquaculture animal and aquaculture animal product movement records were inspected and found to be inadequately maintained.

No mortality had been observed on site since the last inspection by Marine Scotland.

The biosecurity measures plan for the site was not available for inspection.

The following points were raised with the site representative during the inspection:

- Site name and number not included in movement records. This issue was discussed during the inspection and a new aquaculture animal and product movement record book has been sent to the site by post which is to be used in replacement to the sites current electronic version of movement records. No further action required on this point.
- The site specific biosecurity measures plan was not available during the inspection. A template biosecurity measures plan was sent to the site contact. This needs to be adapted to be specific to Mol Mor (SS0369) and returned to the Fish Health Inspectorate for evidence that these measures have been implemented.

These must be addressed to ensure the conditions of authorisation for your Aquaculture Production Business (APB) are being met. Records or documentation demonstrating that these points have been addressed should be sent to the Fish Health Inspectorate (contact details below) within 30 days of the date this report was issued.

Please contact myself or the duty inspector should you require any assistance or clarification in implementing any requirement or recommendation detailed in this report.

### Warning letter issued

Issues were raised in relation to the above case, with a requirement for records unavailable for inspection to be submitted by 18/08/2023. The required records have not been provided to the Fish Health Inspectorate.

A warning letter was issued on 01/02/2024 requesting that the records are made available for inspection by 01/03/2024. Failure to comply with the warning letter may result in enforcement action being taken.

Please contact myself or the duty inspector should you require any further information or have any queries regarding this report.
